

Monthly estimated population in the West department (July 2023 - June 2024): - 30,800 residents

Key observations for the period July 2023 - June 2024

Due to internal mobility, the population of the West (Ouest) department has declined by 30,800 people from July 2023 to June 2024.

People who left the West (Ouest) department relocated throughout the country, particularly to the Greater South:

- South (Sud) department: + 7,500 (including + 3,000 in Les Cayes),
- South-East (Sud-Est): + 6,900 (including + 2,000 in Jacmel),
- Nippes: + 4,100,
- and Grand’Anse: + 3,100.

The North (Nord) department received 4,100 more people (including + 2,000 in central Cap Haitien).

Within the West (Ouest) department, 30,000 people left 1ere Section Turgeau in Port-au-Prince commune over the last 12 months, for other sections in West or outside.

The largest population changes occurred from January 2024 onwards. Changes are not always progressive and urban communal sections (Port-au-Prince, Jacmel, Les Cayes, Cap Haitien) can see large fluctuations, gaining or losing over 1,000 residents from one month to the next.

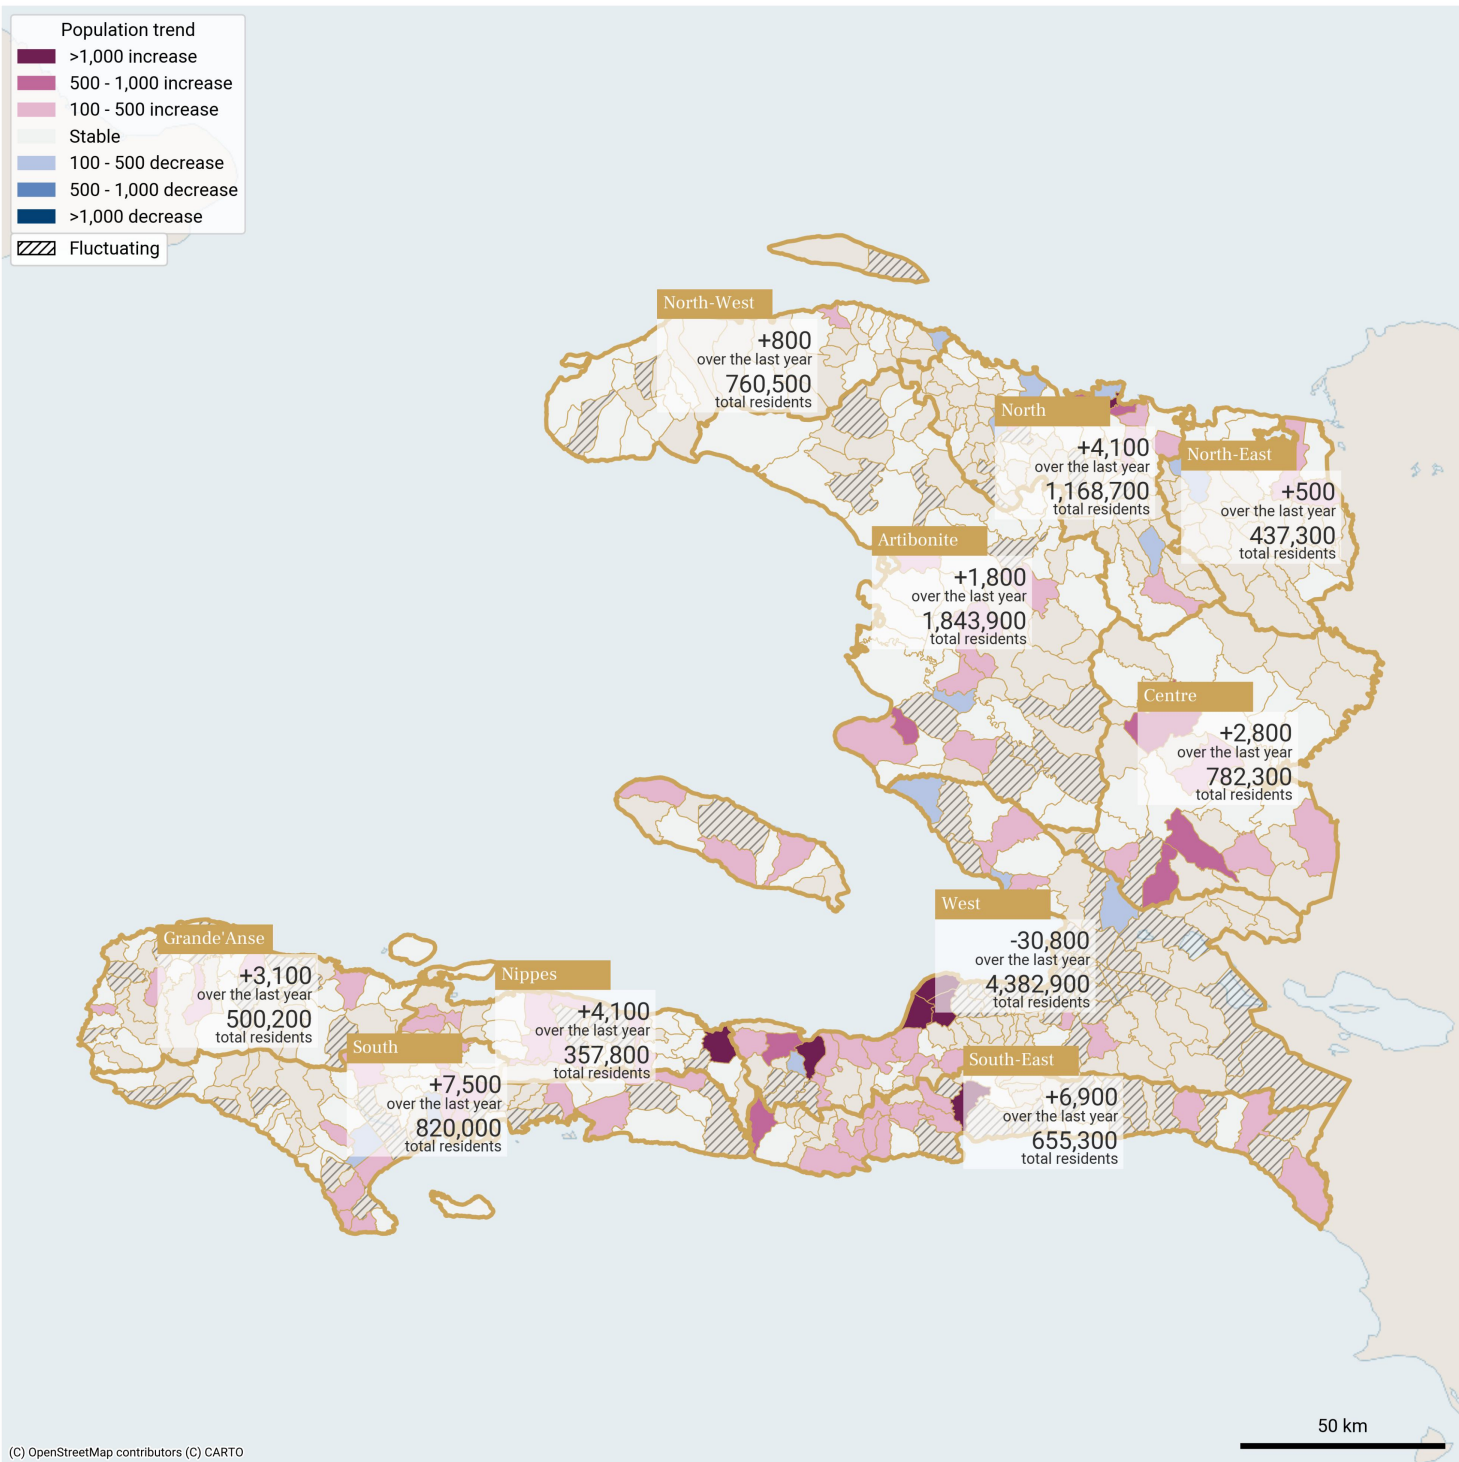

How to use this report

Population estimates per communal section per month can help prepare for and respond to crises, and plan services, by quantifying up-to-date population exposure to hazards, and informing on predictable trends in population change. We highlight communal sections with steady increases or decreases in population that could make annual population statistics outdated, or unusually large month-to-month fluctuations that would increase margin of errors around static population estimates.

Data source

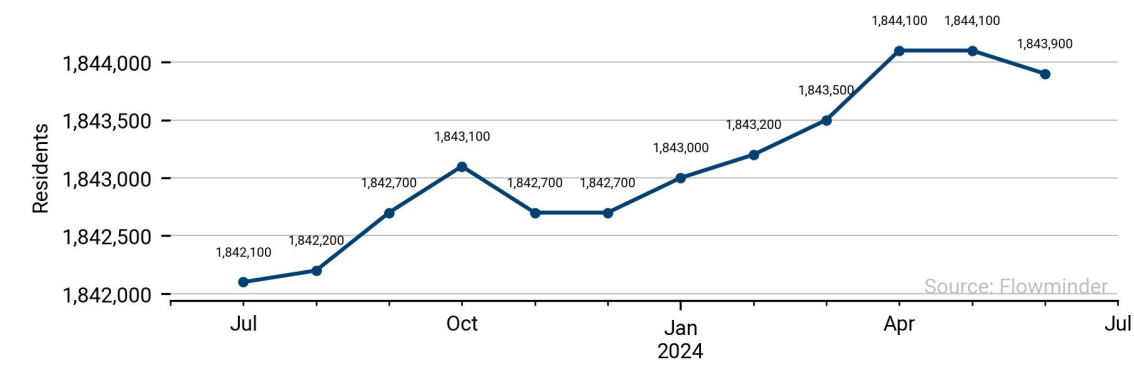

Estimates used in this report, and associated documentation, are available at haiti.mobility-dashboard.org after registration. Monthly estimates of population per communal section (the “de facto” population) - derived from anonymous mobile phone data, weighted using survey data but unadjusted for population change due to births, deaths, immigration and emigration - only considering internal mobility in Haiti.

Changes in population estimates per department and communal section (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

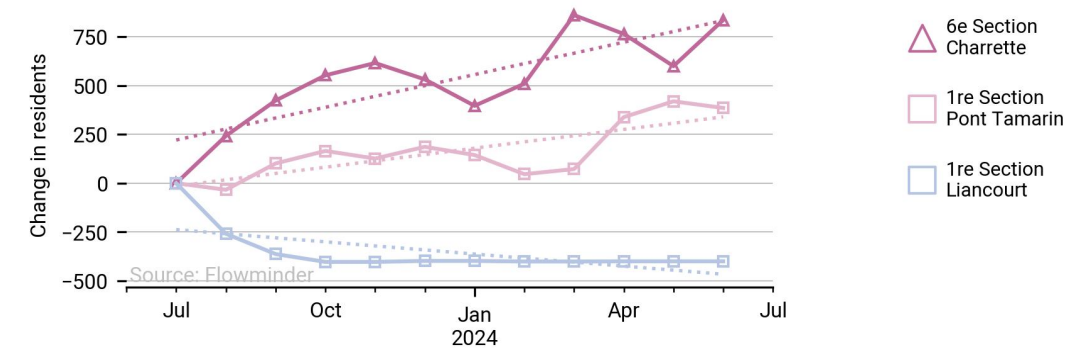

Preparedness | Mobility situation report - Haiti
Part 2 | Artibonite department overview (July 2023 - June 2024)

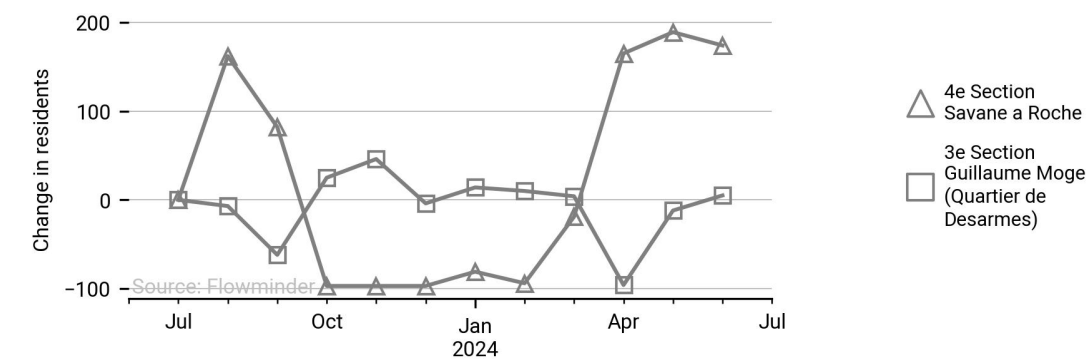

Monthly estimated population in Artibonite (July 2023 - June 2024): + 1,800 residents

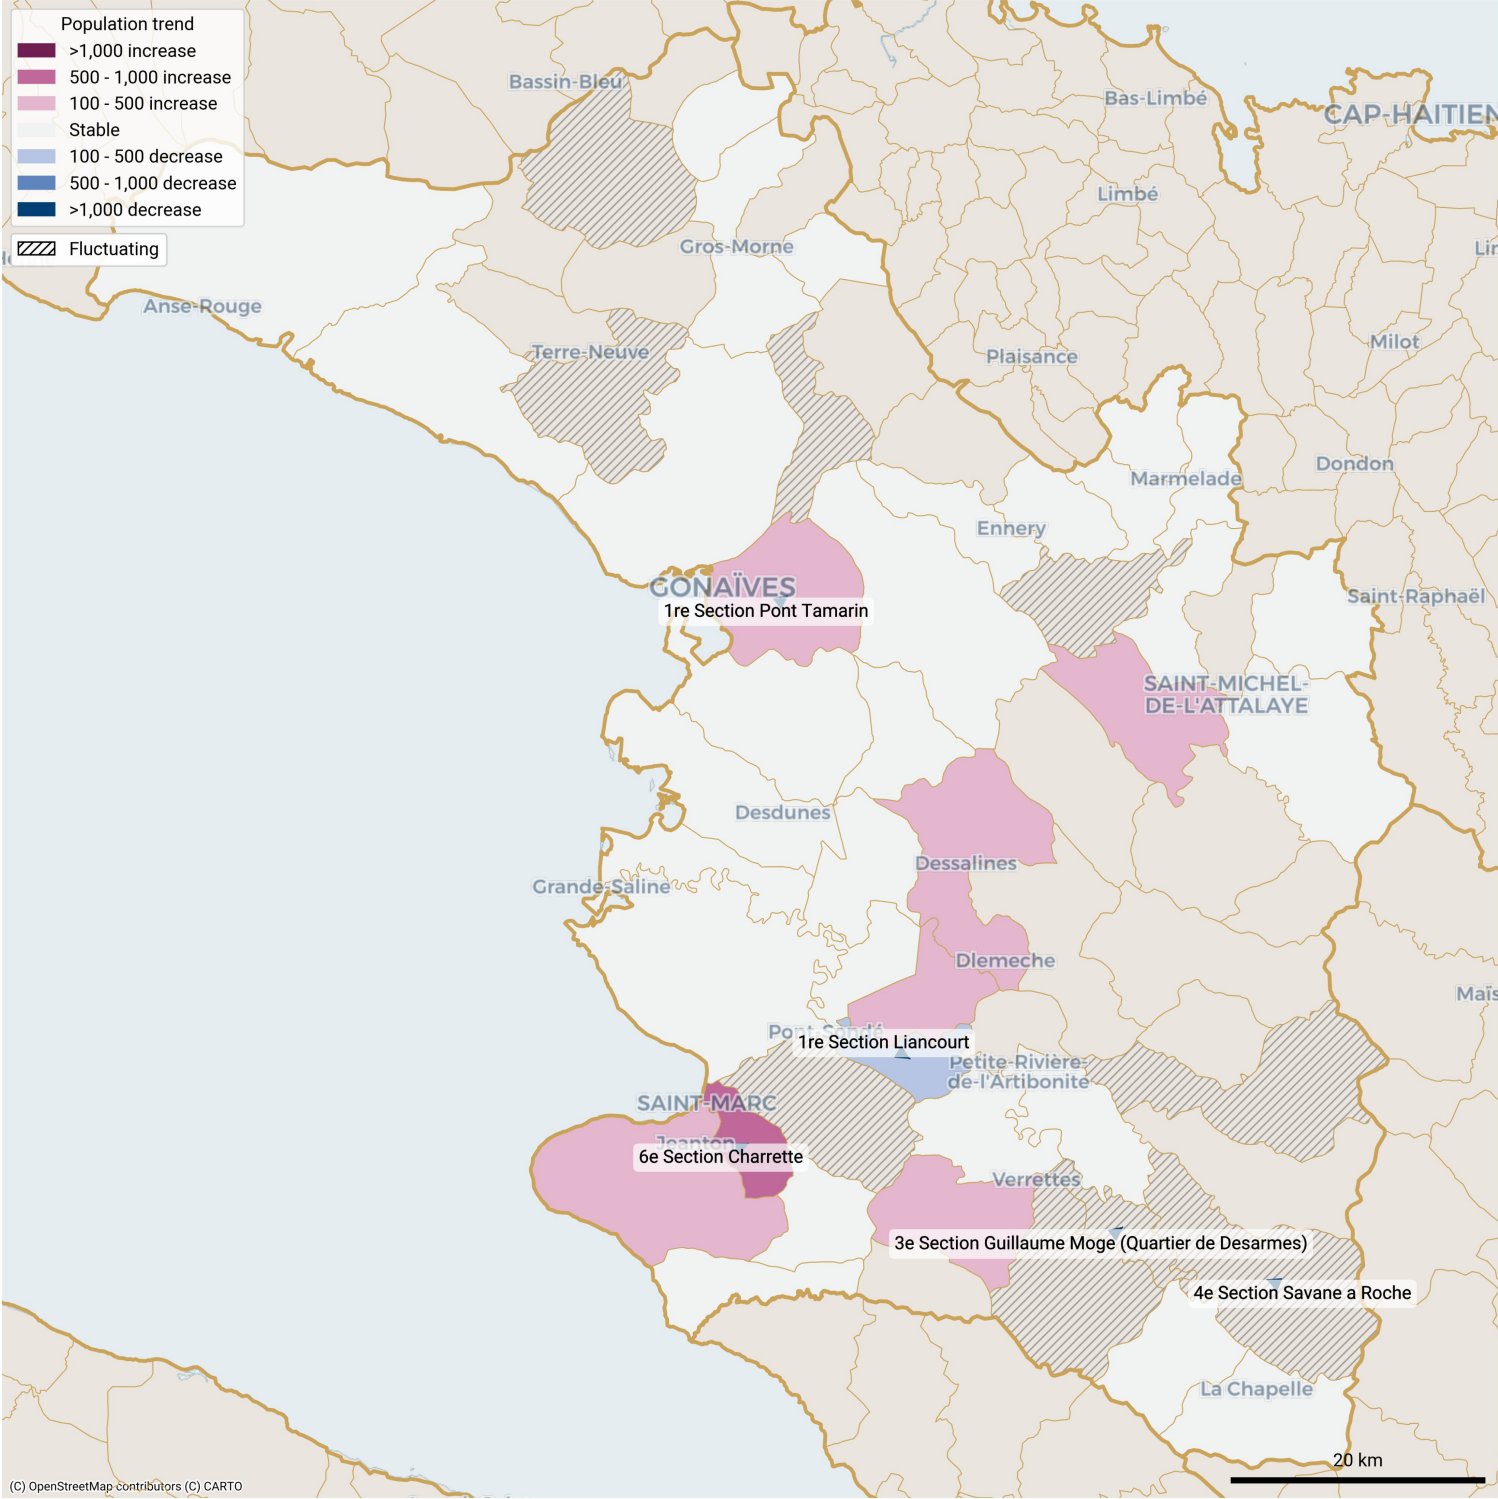

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

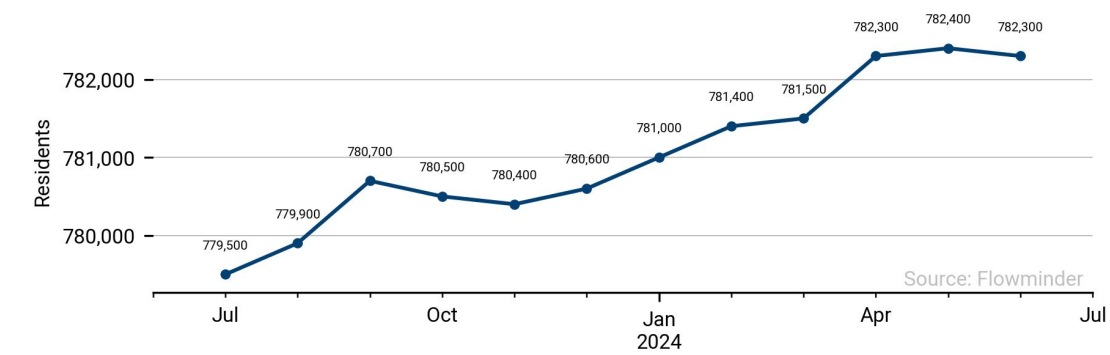

Changes in population estimates per communal section in Artibonite (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

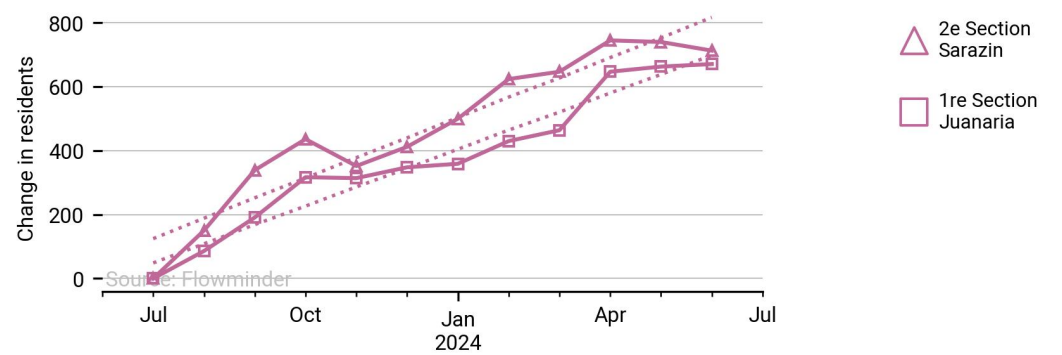

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Centre department overview (July 2023 - June 2024)

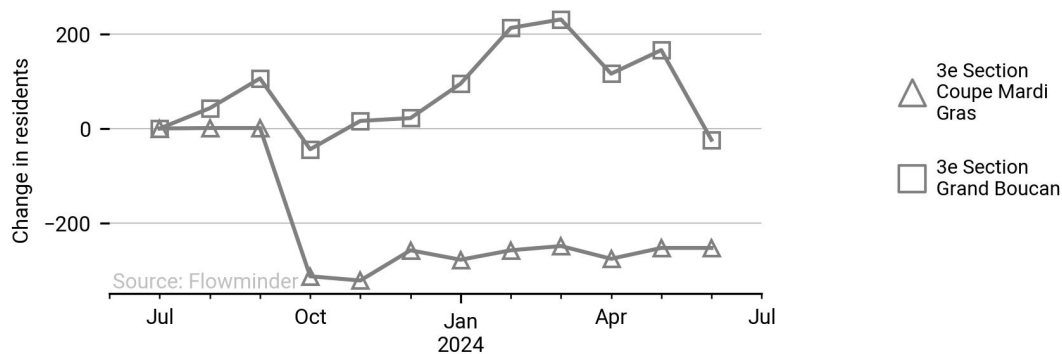

Monthly estimated population in Centre (July 2023 - June 2024): + 2,800 residents

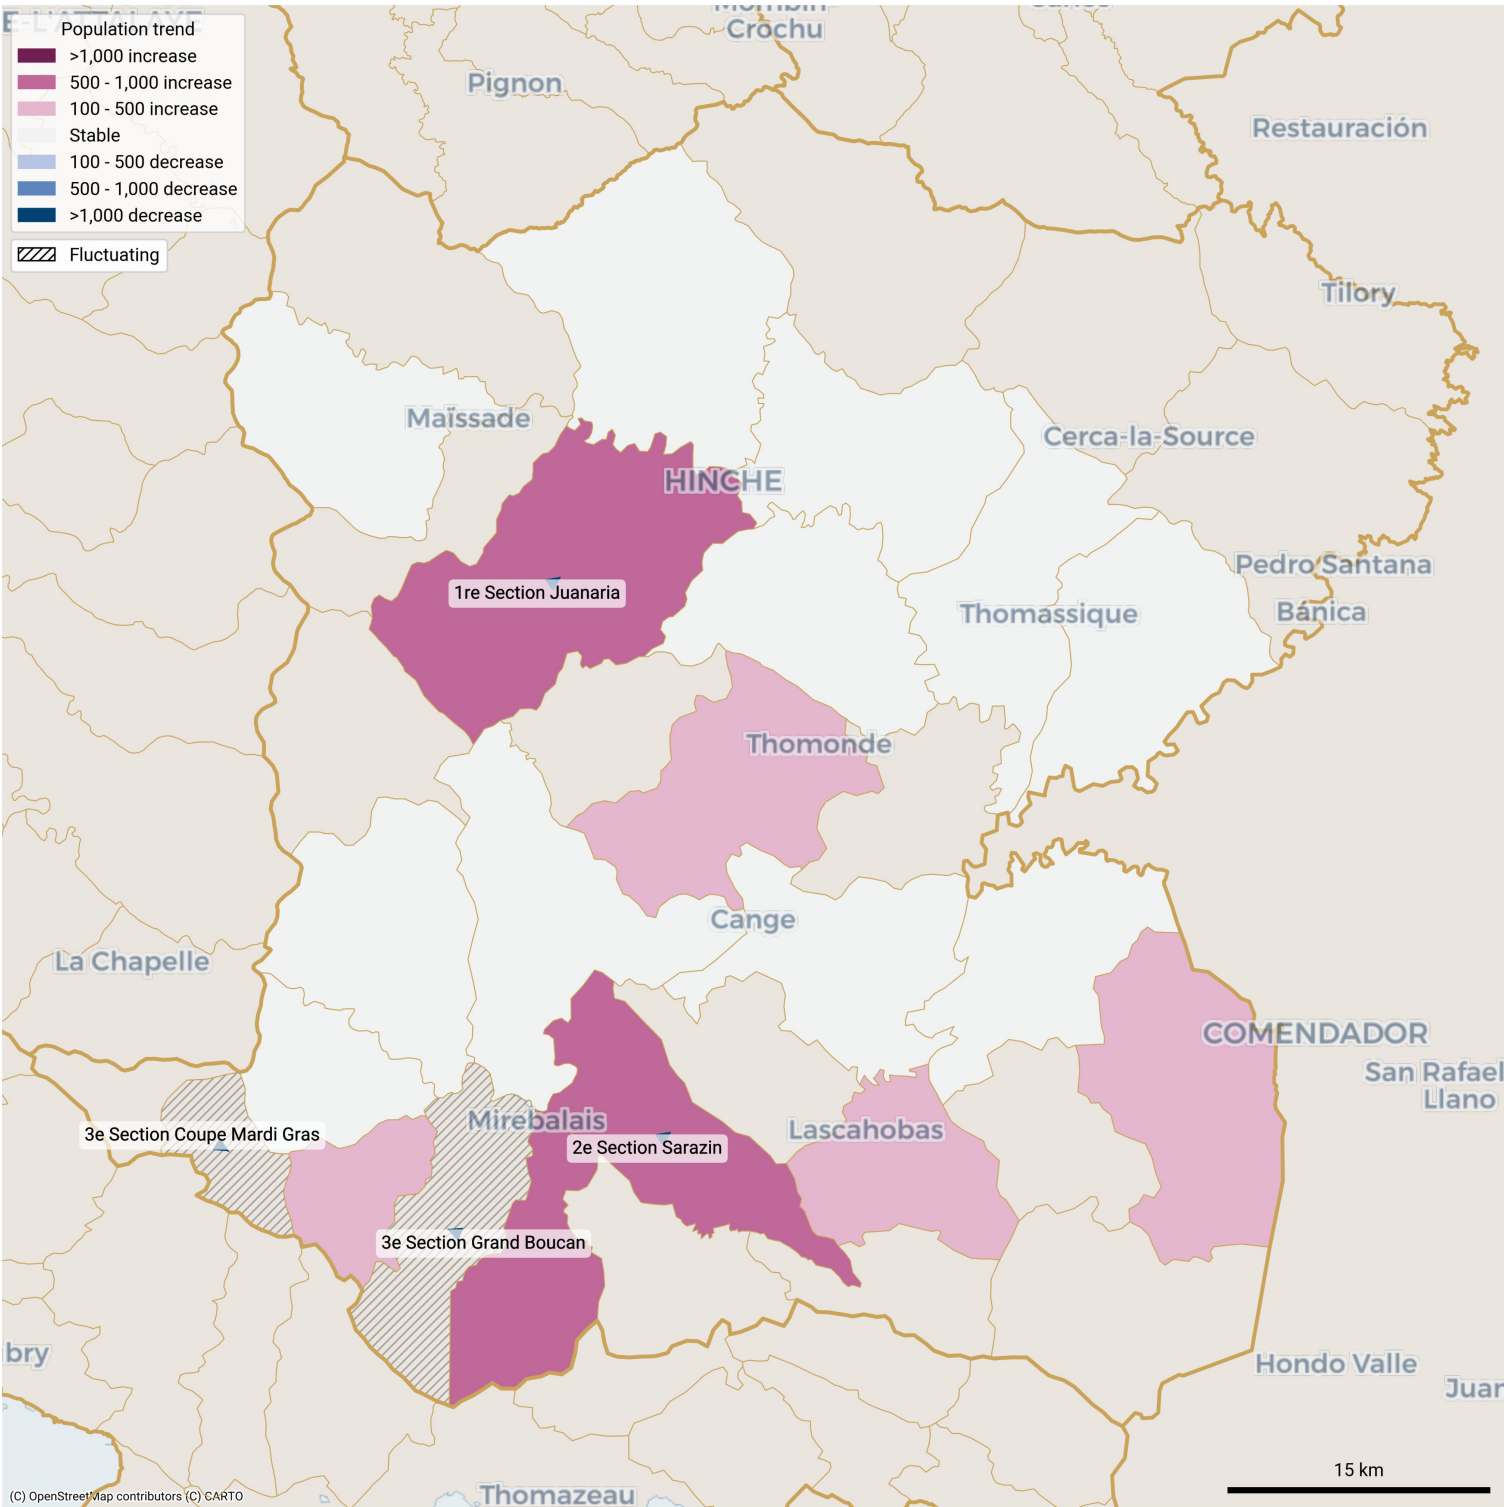

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

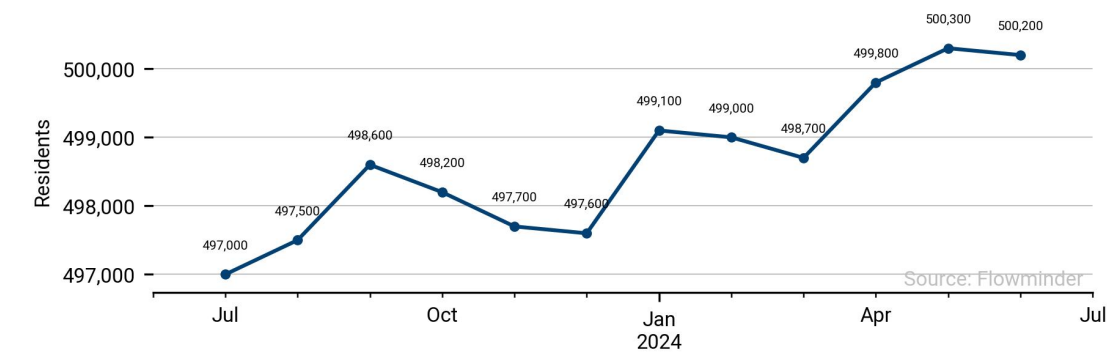

Changes in population estimates per communal section in Centre (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

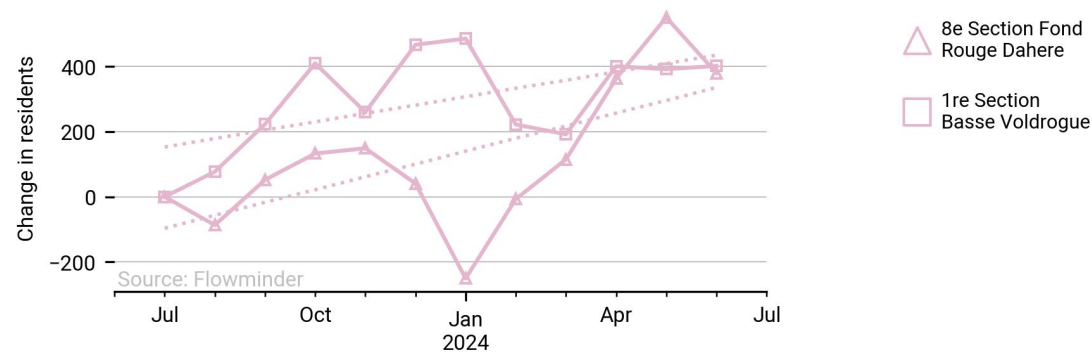

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Grand'Anse department overview (July 2023 - June 2024)

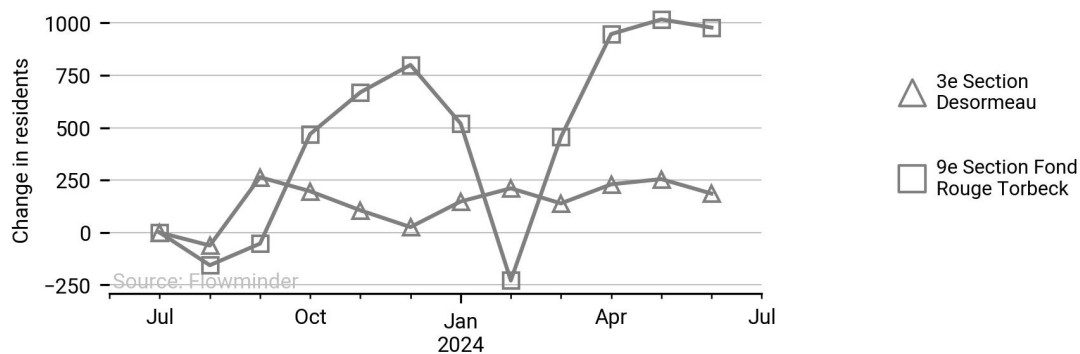

Monthly estimated population in Grand' Anse (July 2023 - June 2024): + 3,100 residents

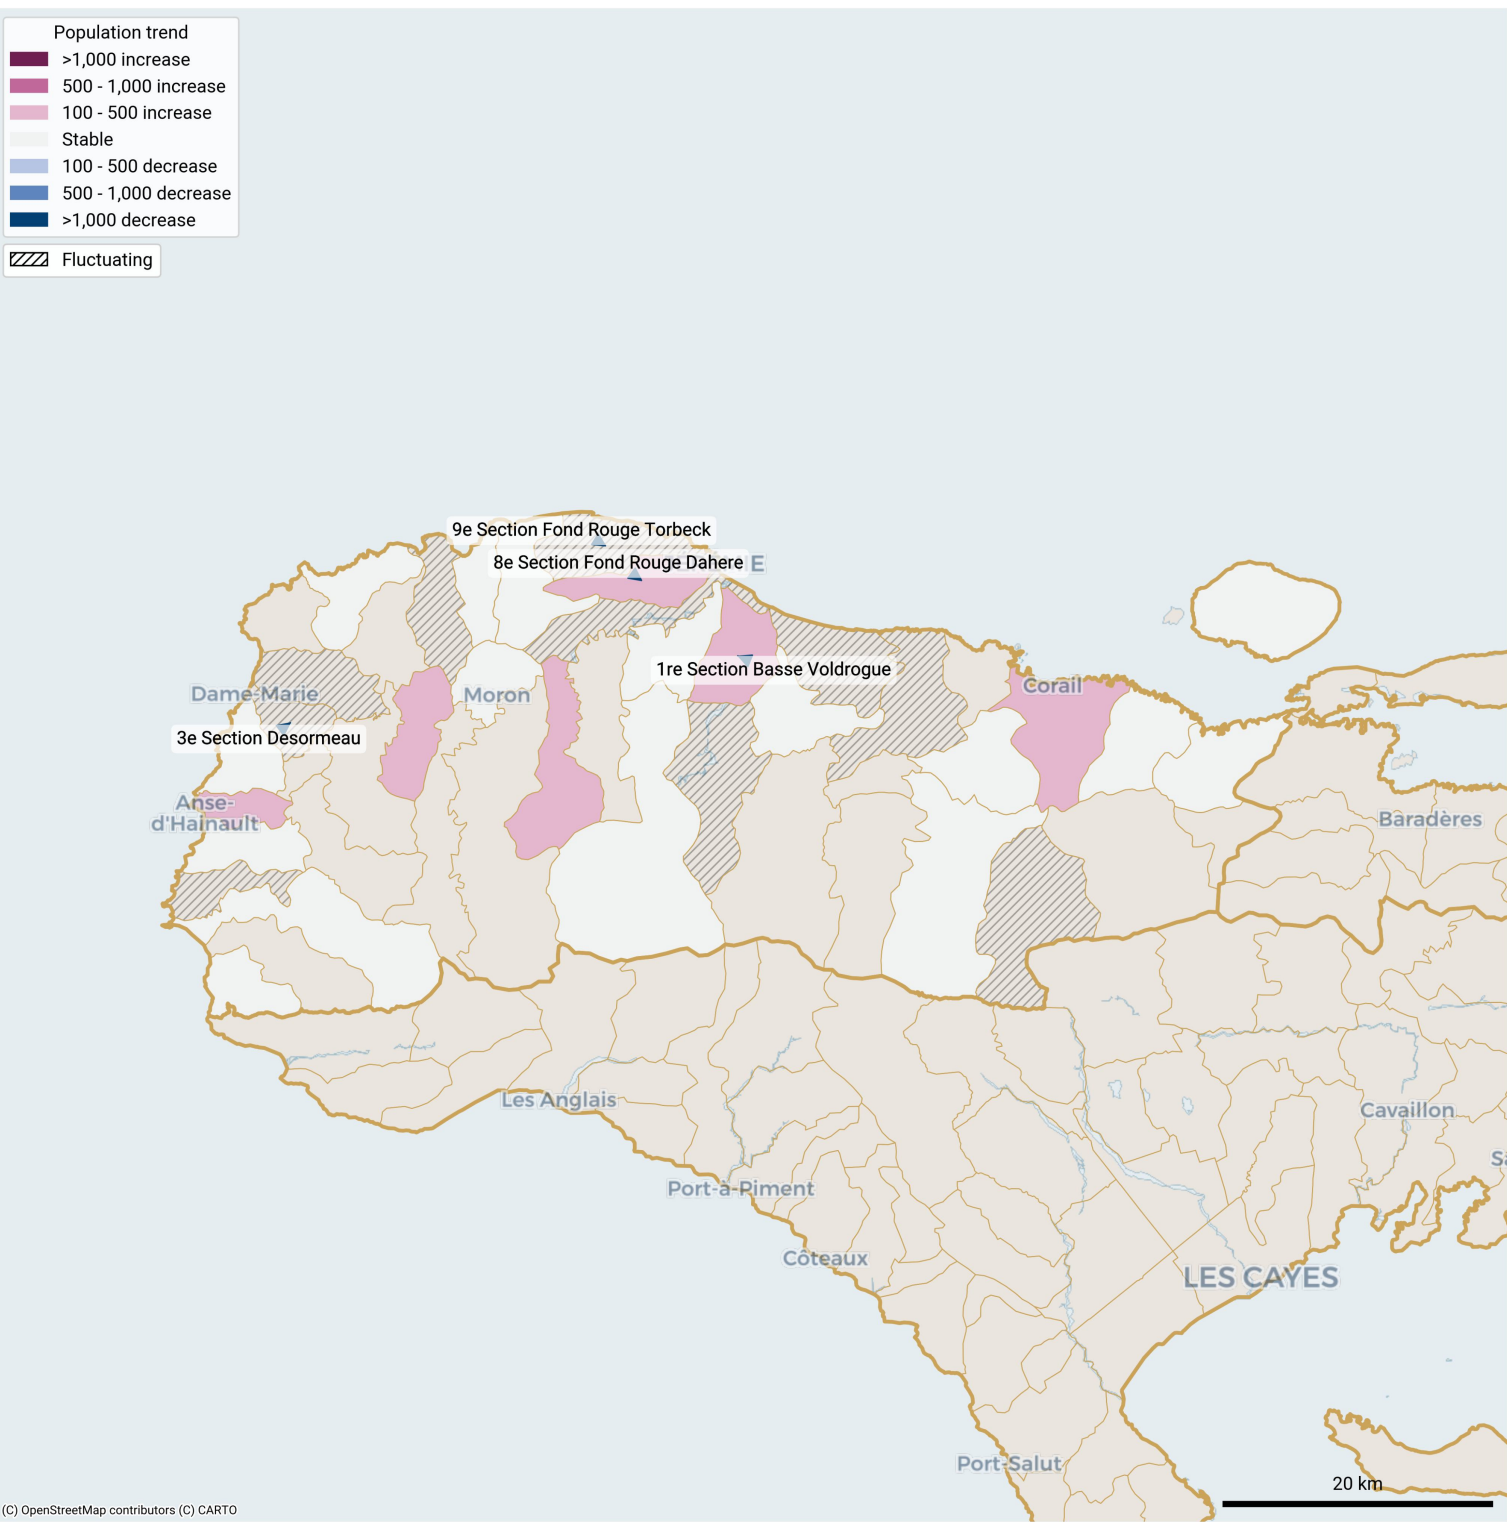

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

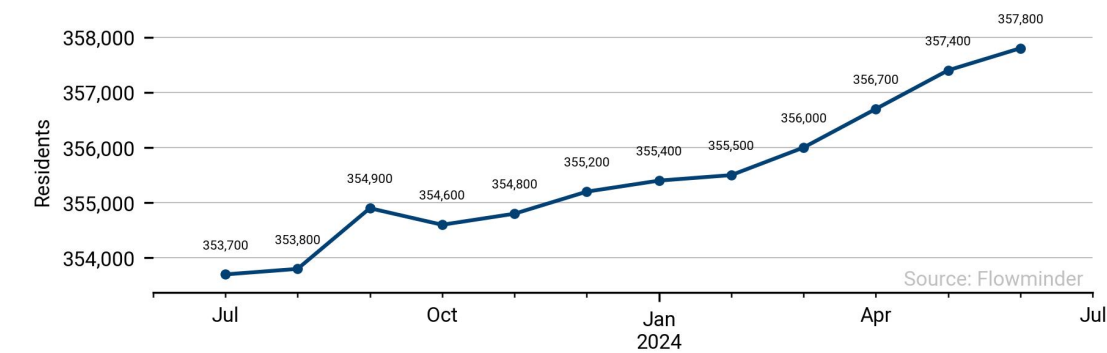

Changes in population estimates per communal section in Grand'Anse (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

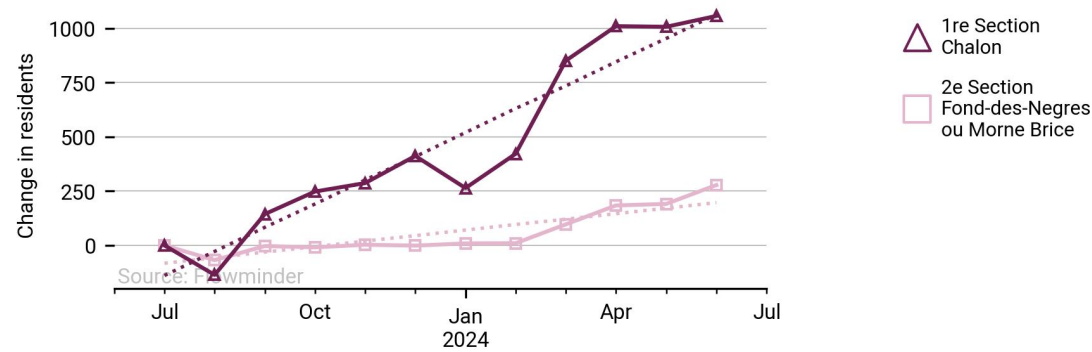

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Nippes department overview (July 2023 - June 2024)

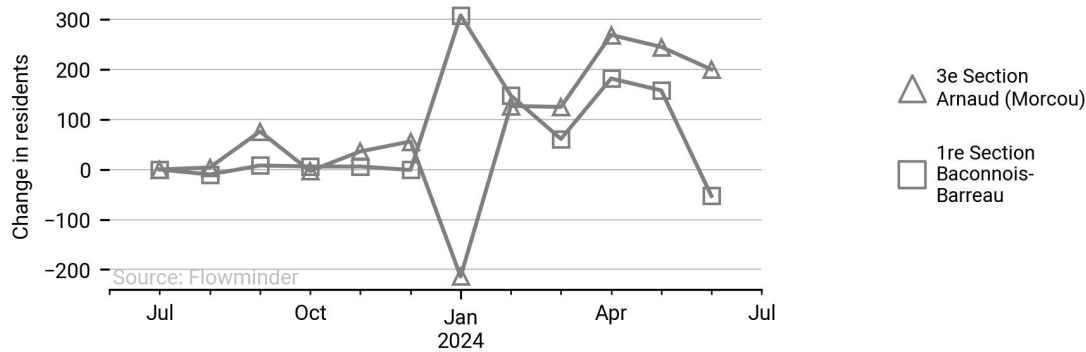

Monthly estimated population in Nippes (July 2023 - June 2024): + 4,100 residents

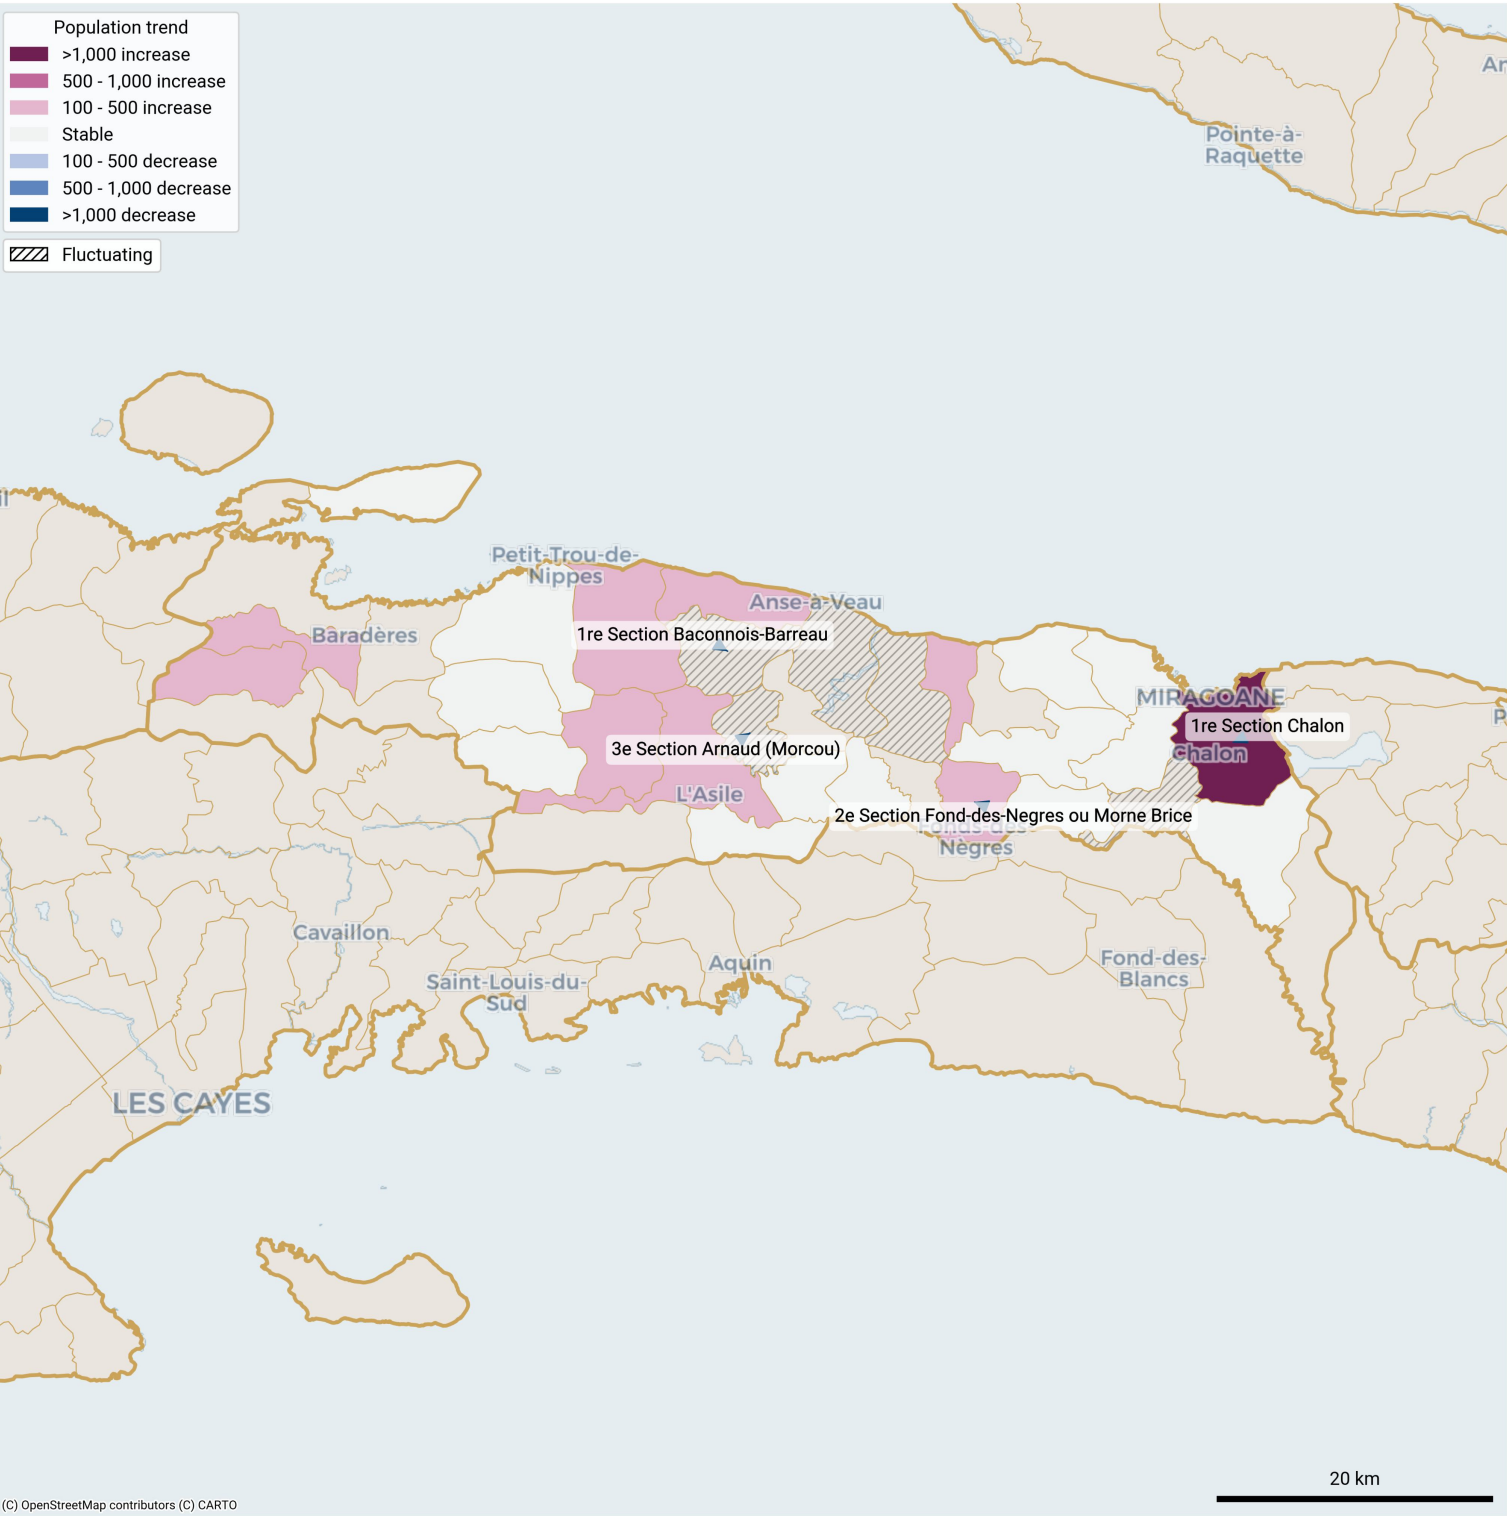

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

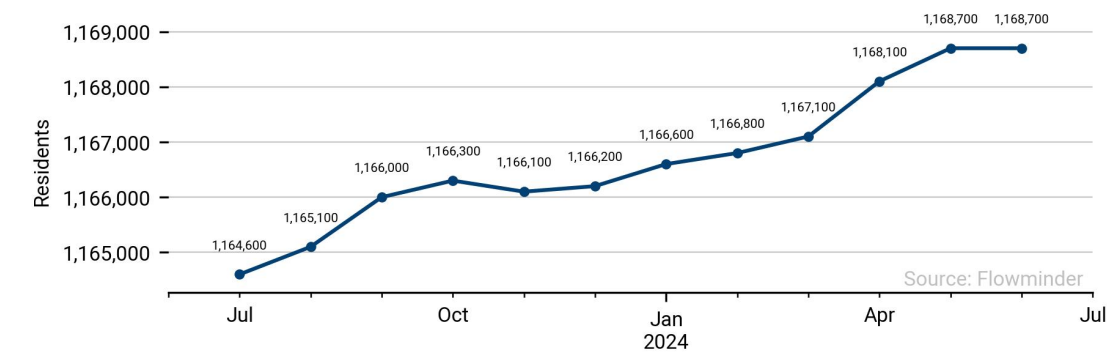

Changes in population estimates per communal section in Nippes (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

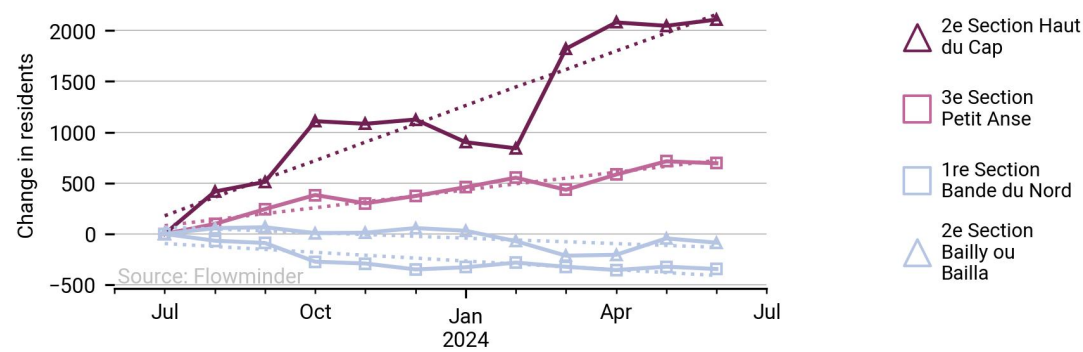

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Nord department overview (July 2023 - June 2024)

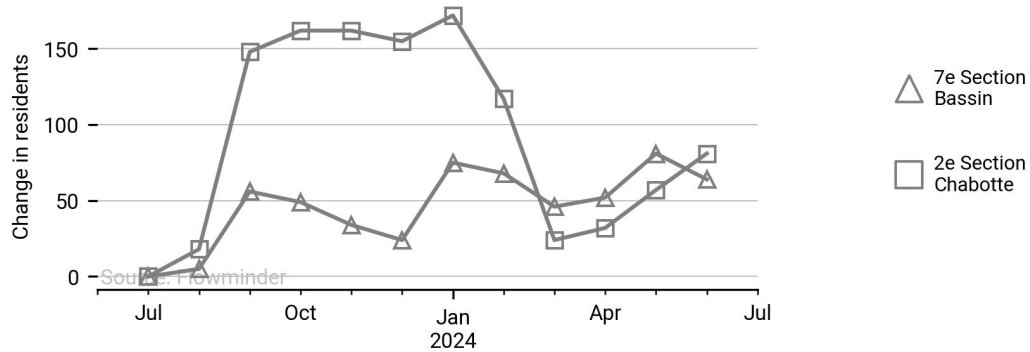

Monthly estimated population in Nord (July 2023 - June 2024): + 4,100 residents

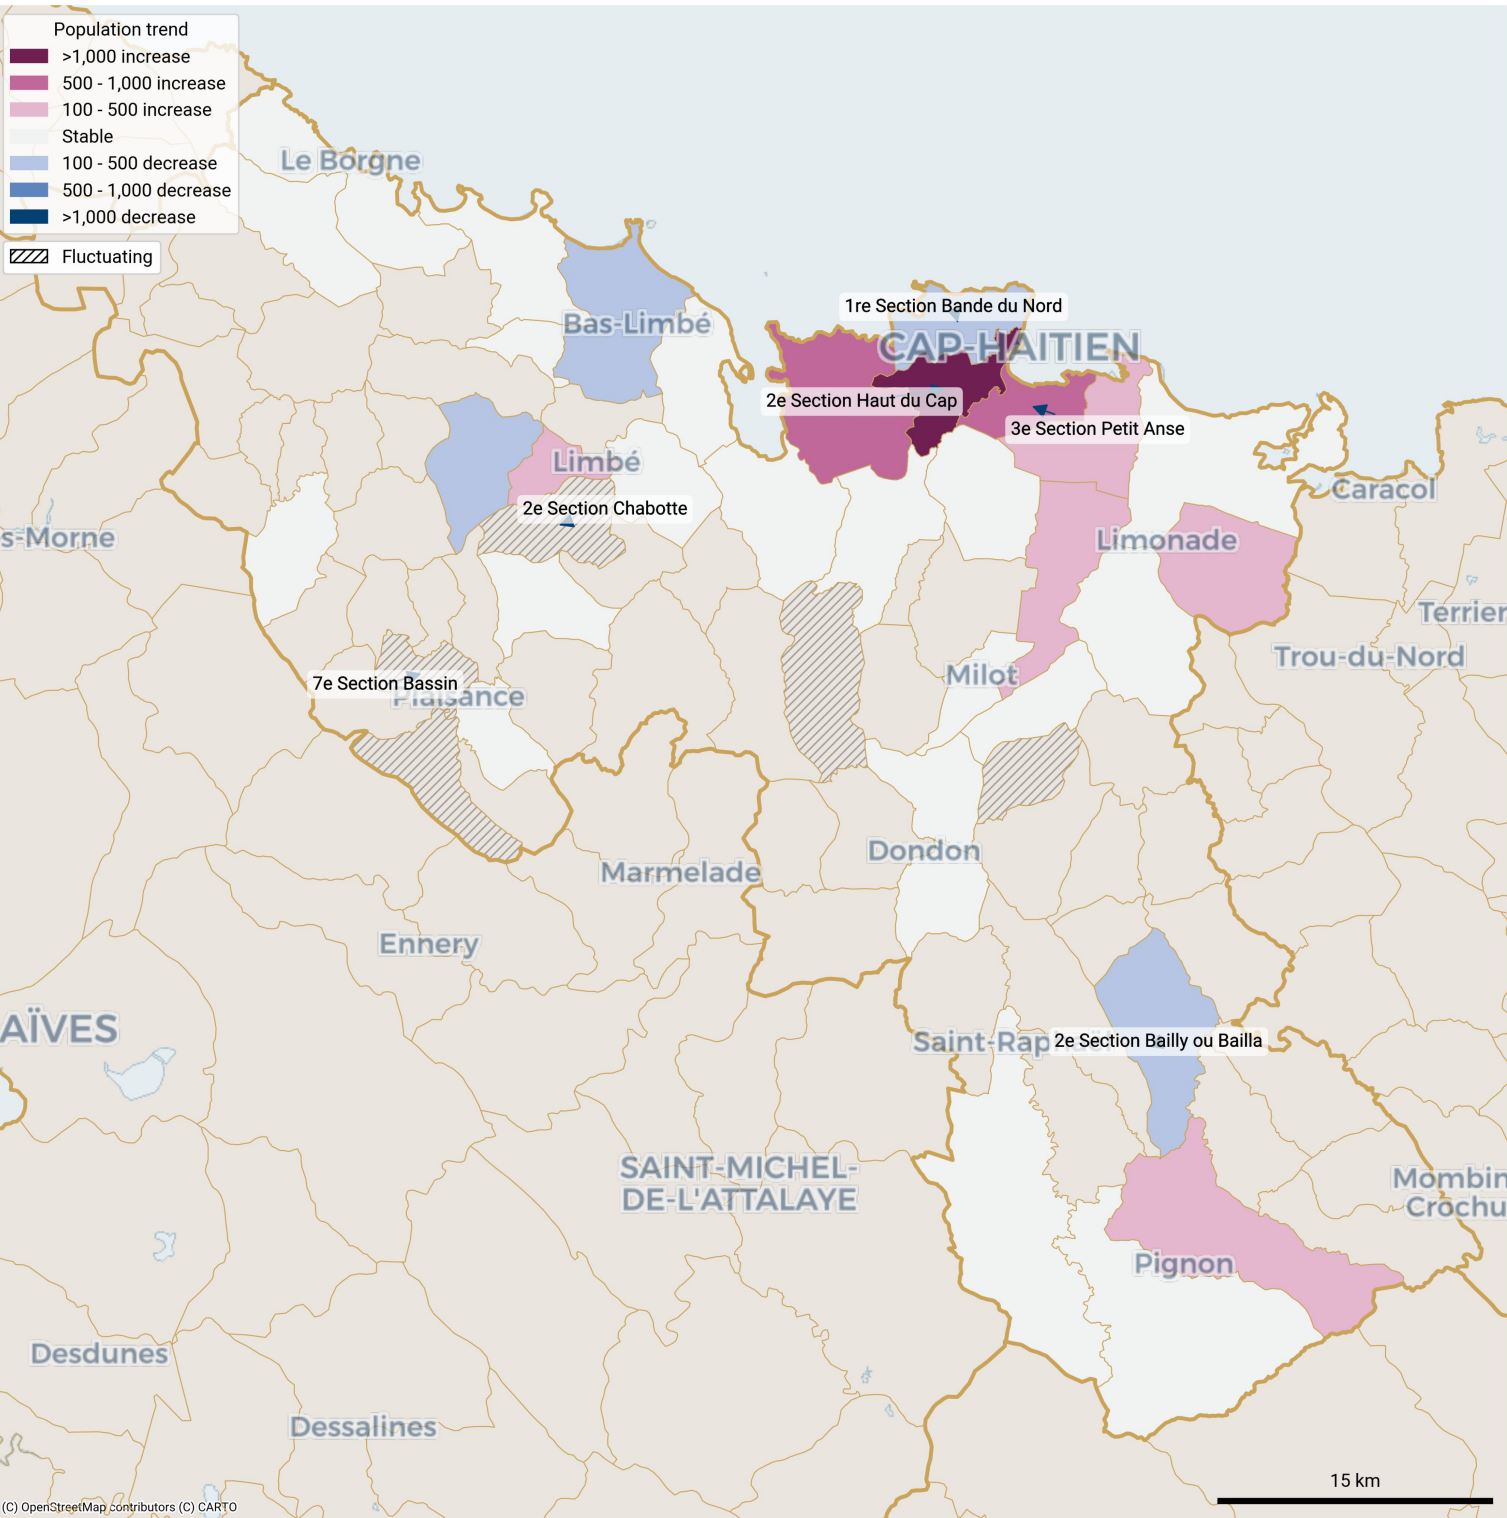

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

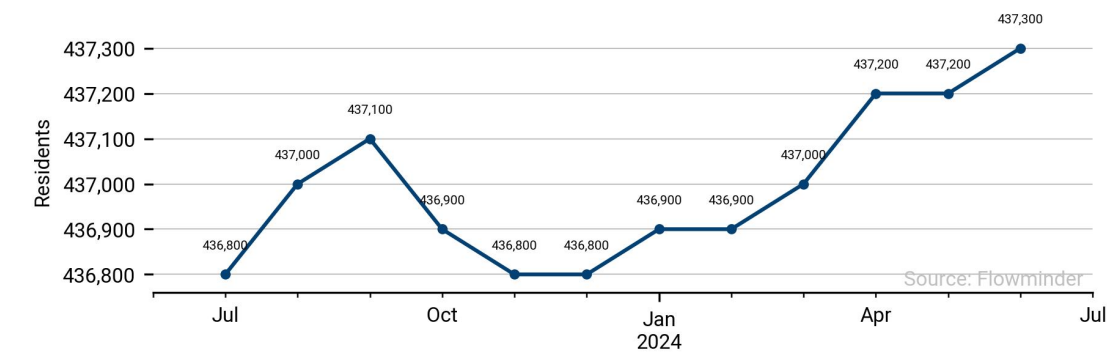

Changes in population estimates per communal section in Nord (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

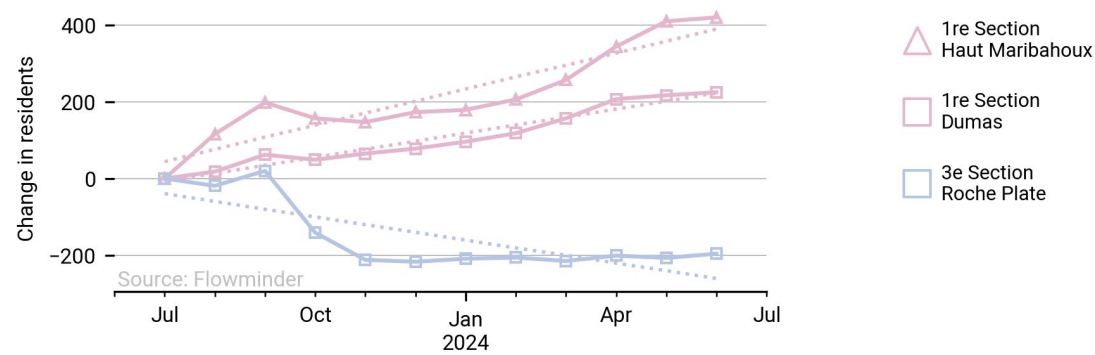

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Nord-Est department overview (July 2023 - June 2024)

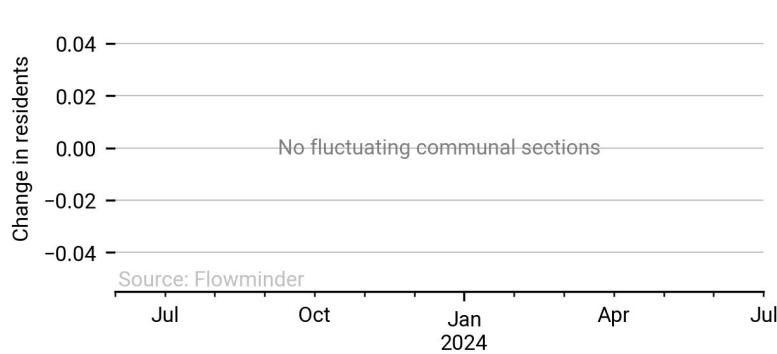

Monthly estimated population in Nord-Est (July 2023 - June 2024): + 500 residents

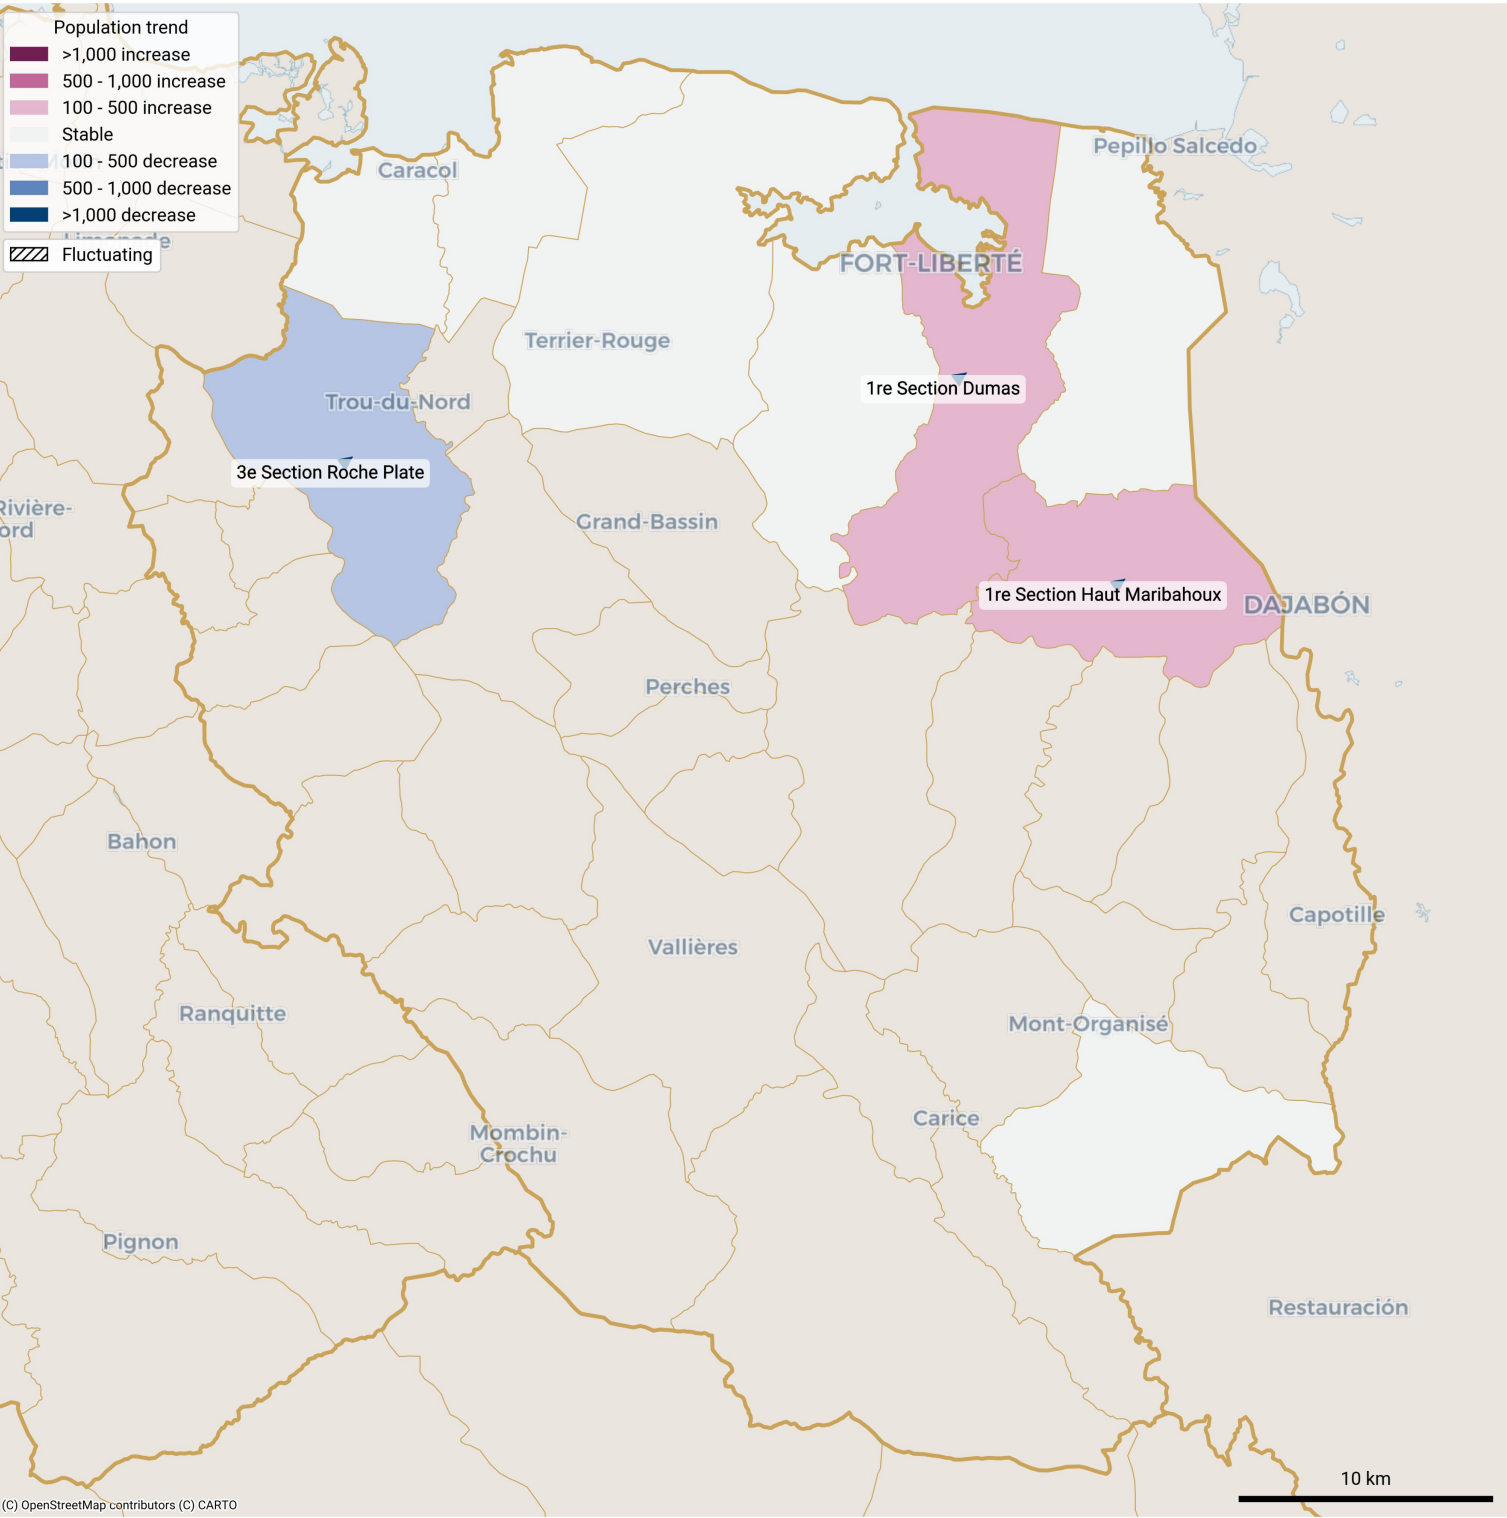

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

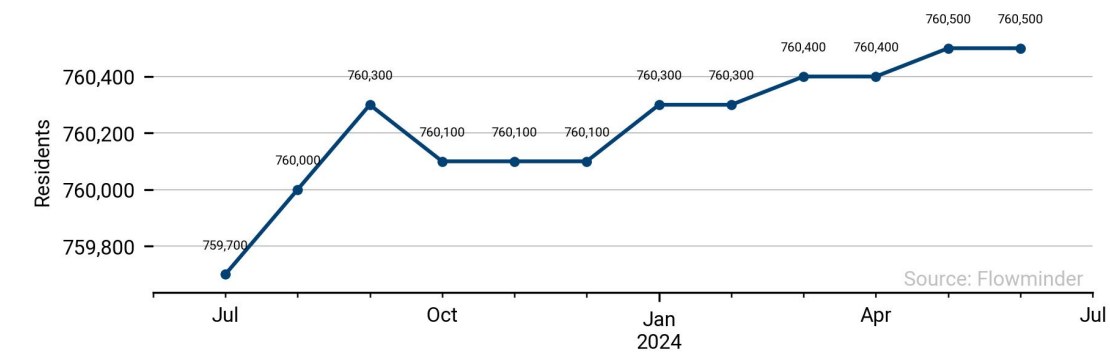

Changes in population estimates per communal section in Nord-Est (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

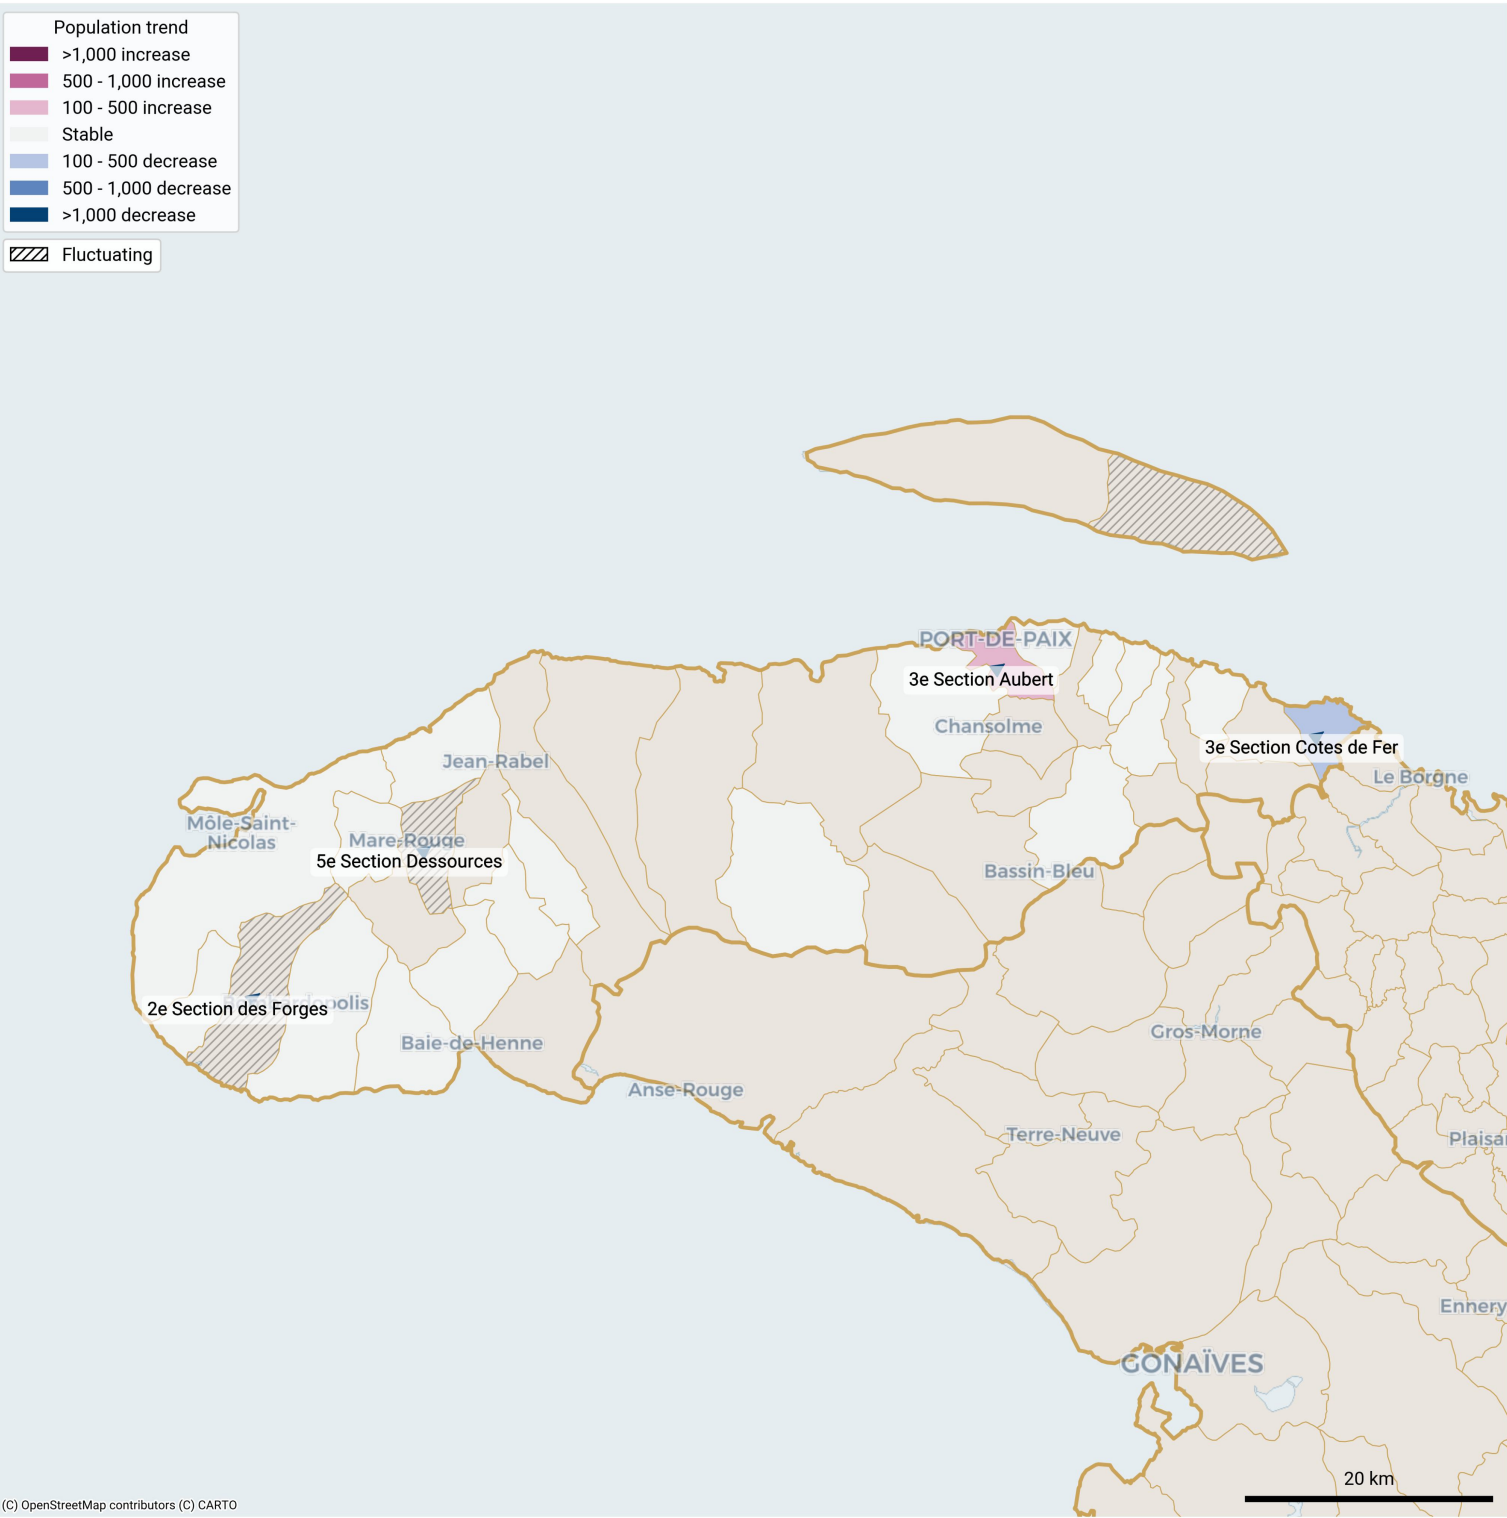

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Nord-Ouest department overview (July 2023 - June 2024)

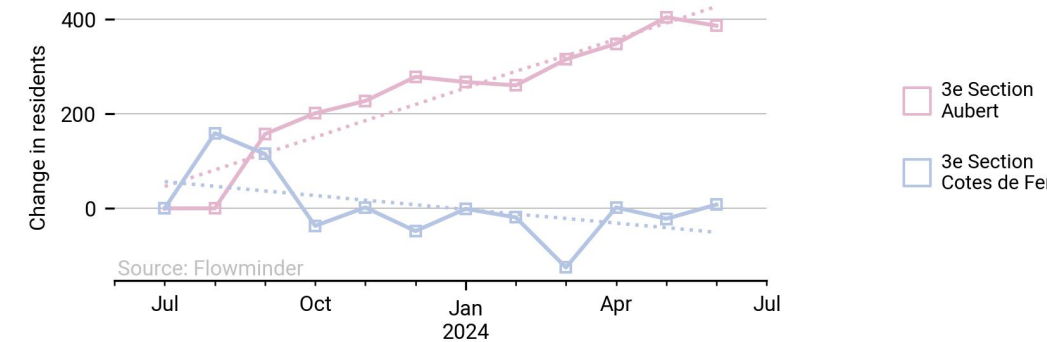

Monthly estimated population in Nord-Ouest (July 2023 - June 2024): + 800 residents

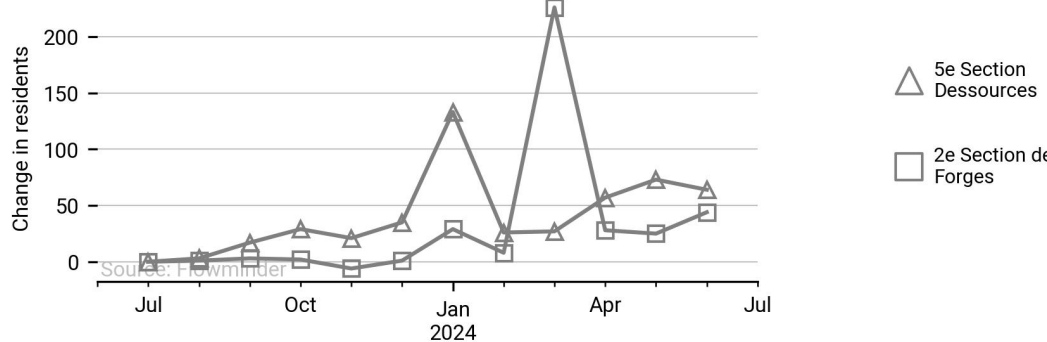

Changes in population estimates per communal section in Nord-Ouest (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

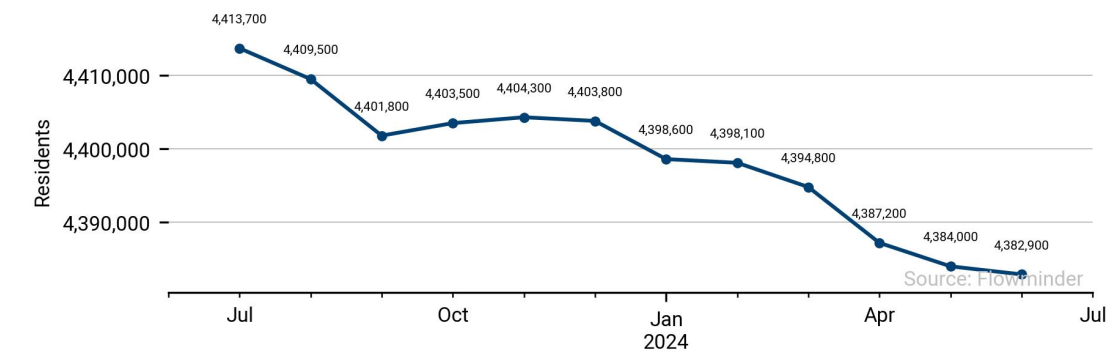

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

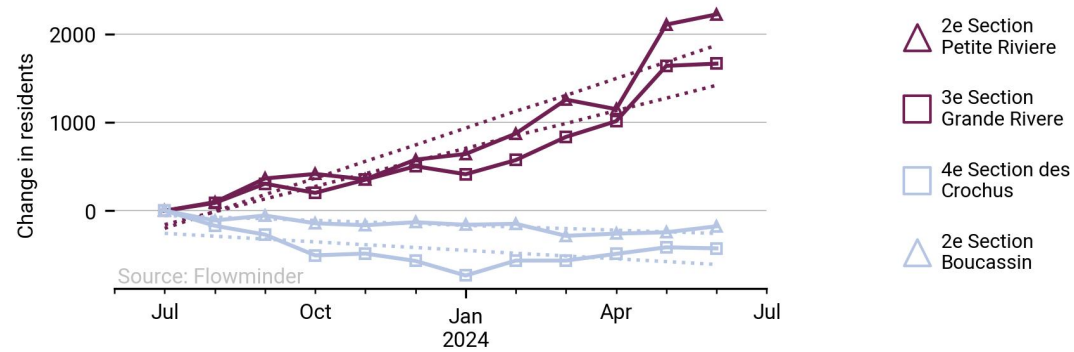

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Ouest department overview (July 2023 - June 2024)

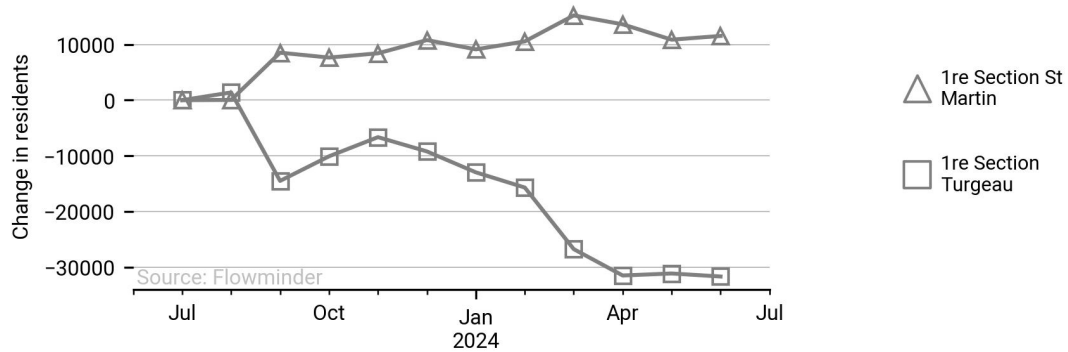

Monthly estimated population in Ouest (July 2023 - June 2024): -30,800 residents

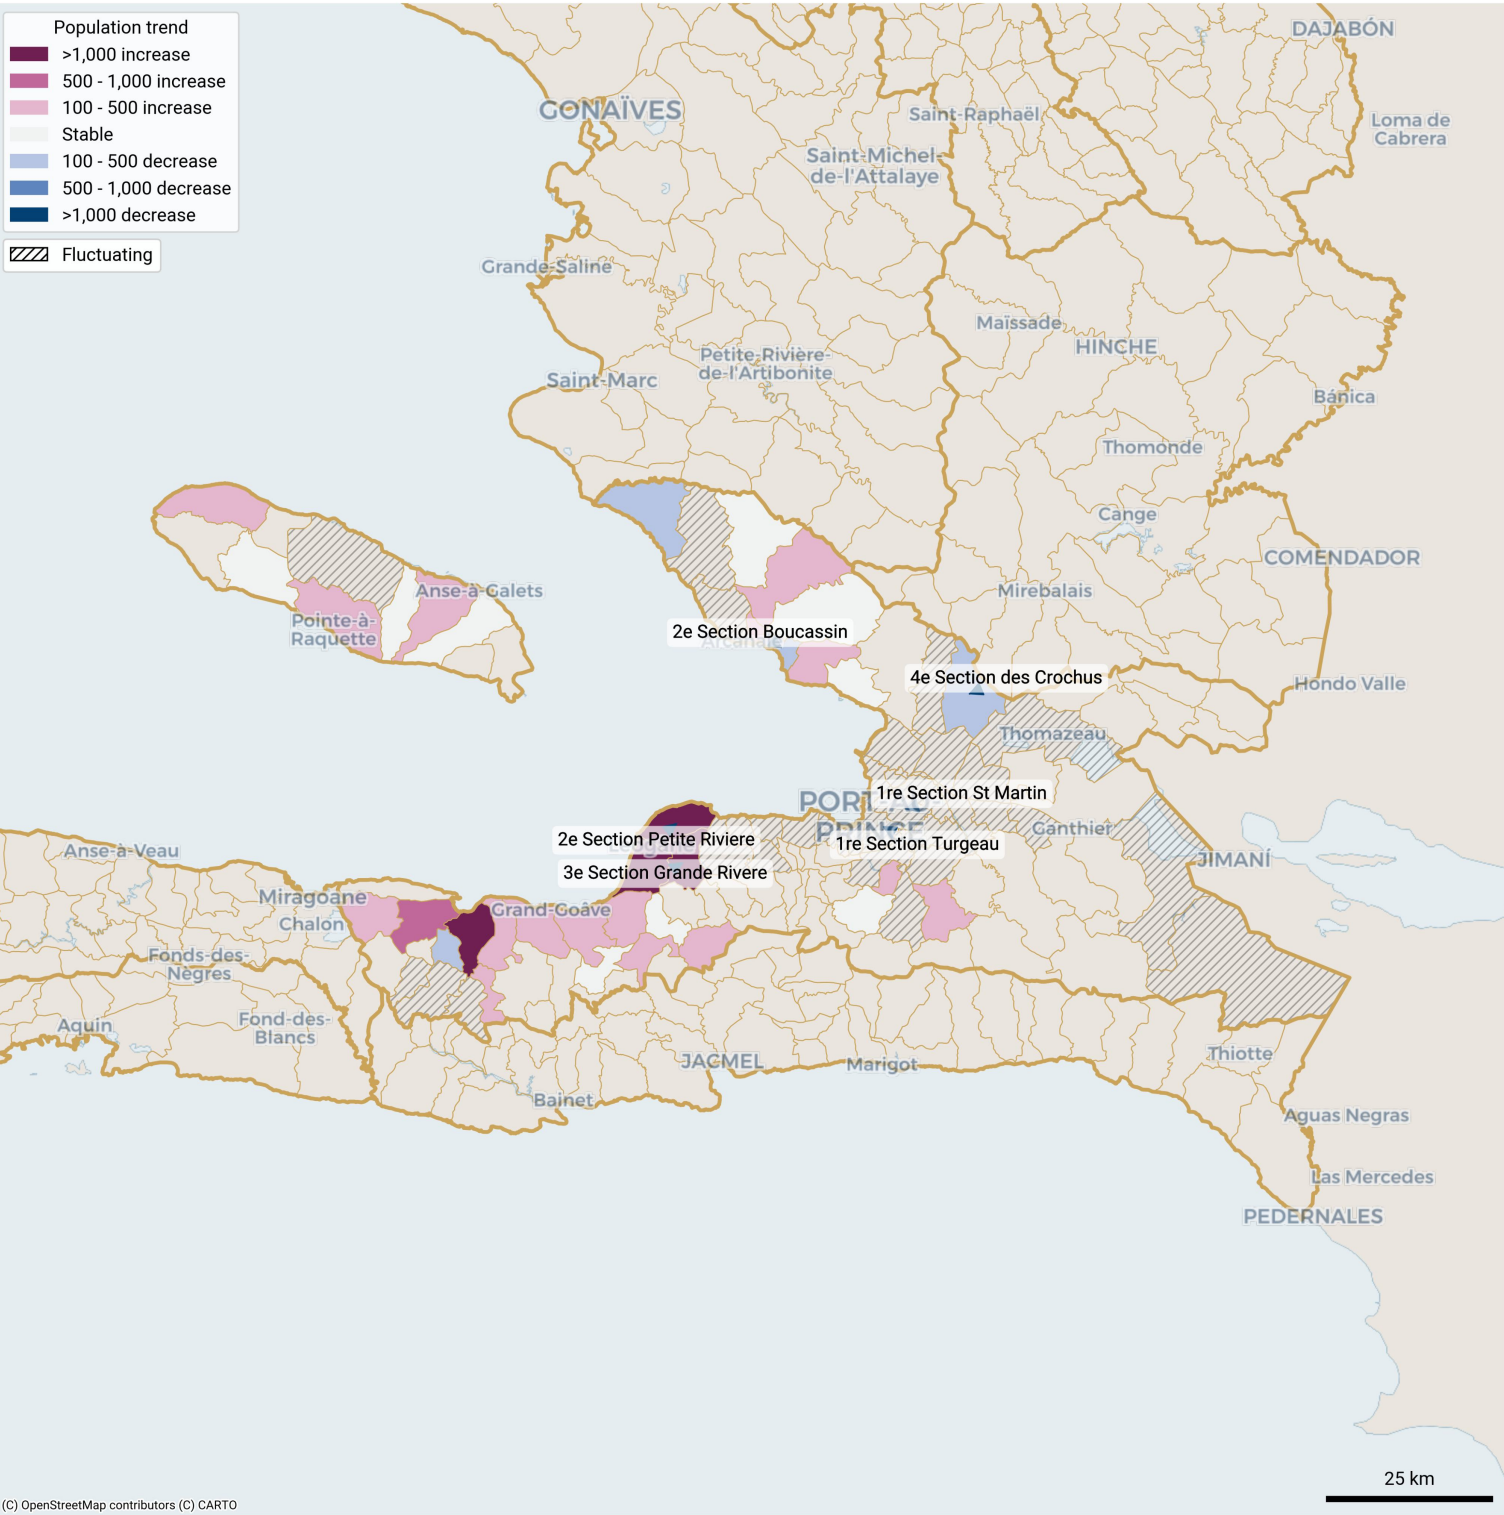

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

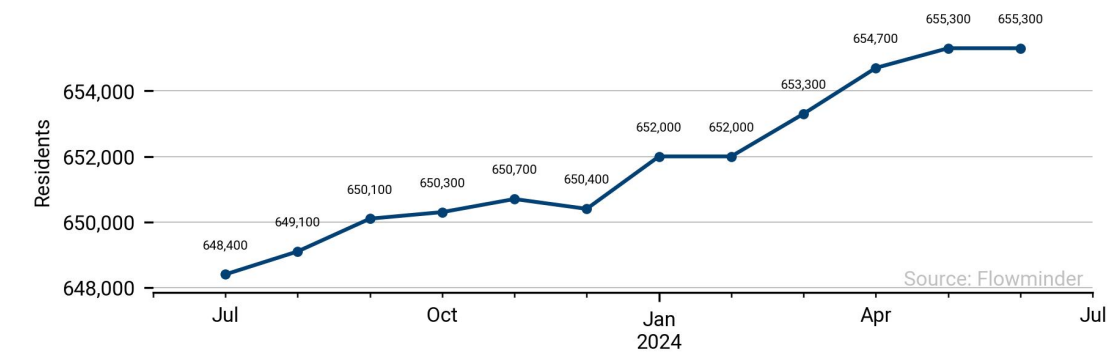

Changes in population estimates per communal section in Ouest (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

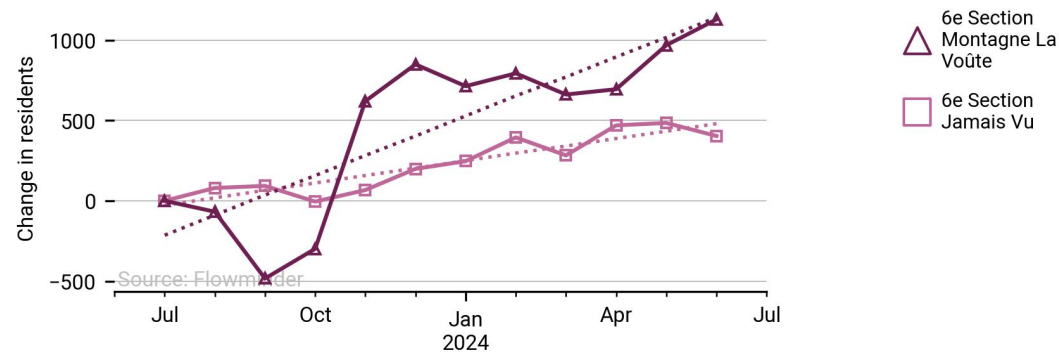

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Sud-Est department overview (July 2023 - June 2024)

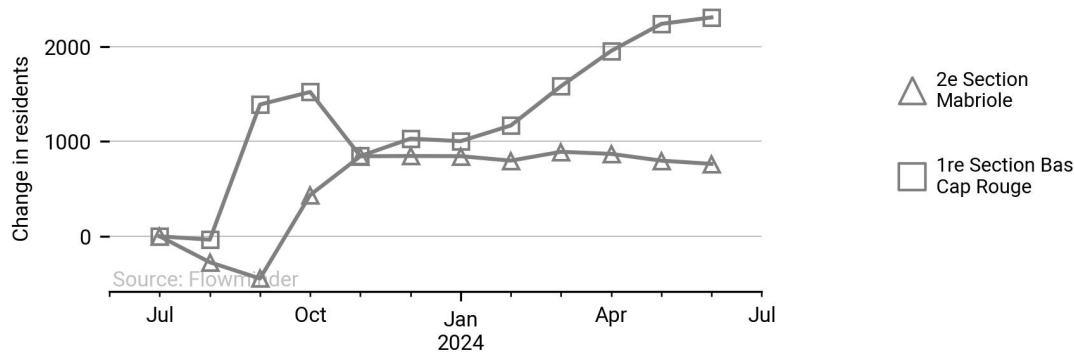

Monthly estimated population in Sud-Est (July 2023 - June 2024): + 6,900 residents

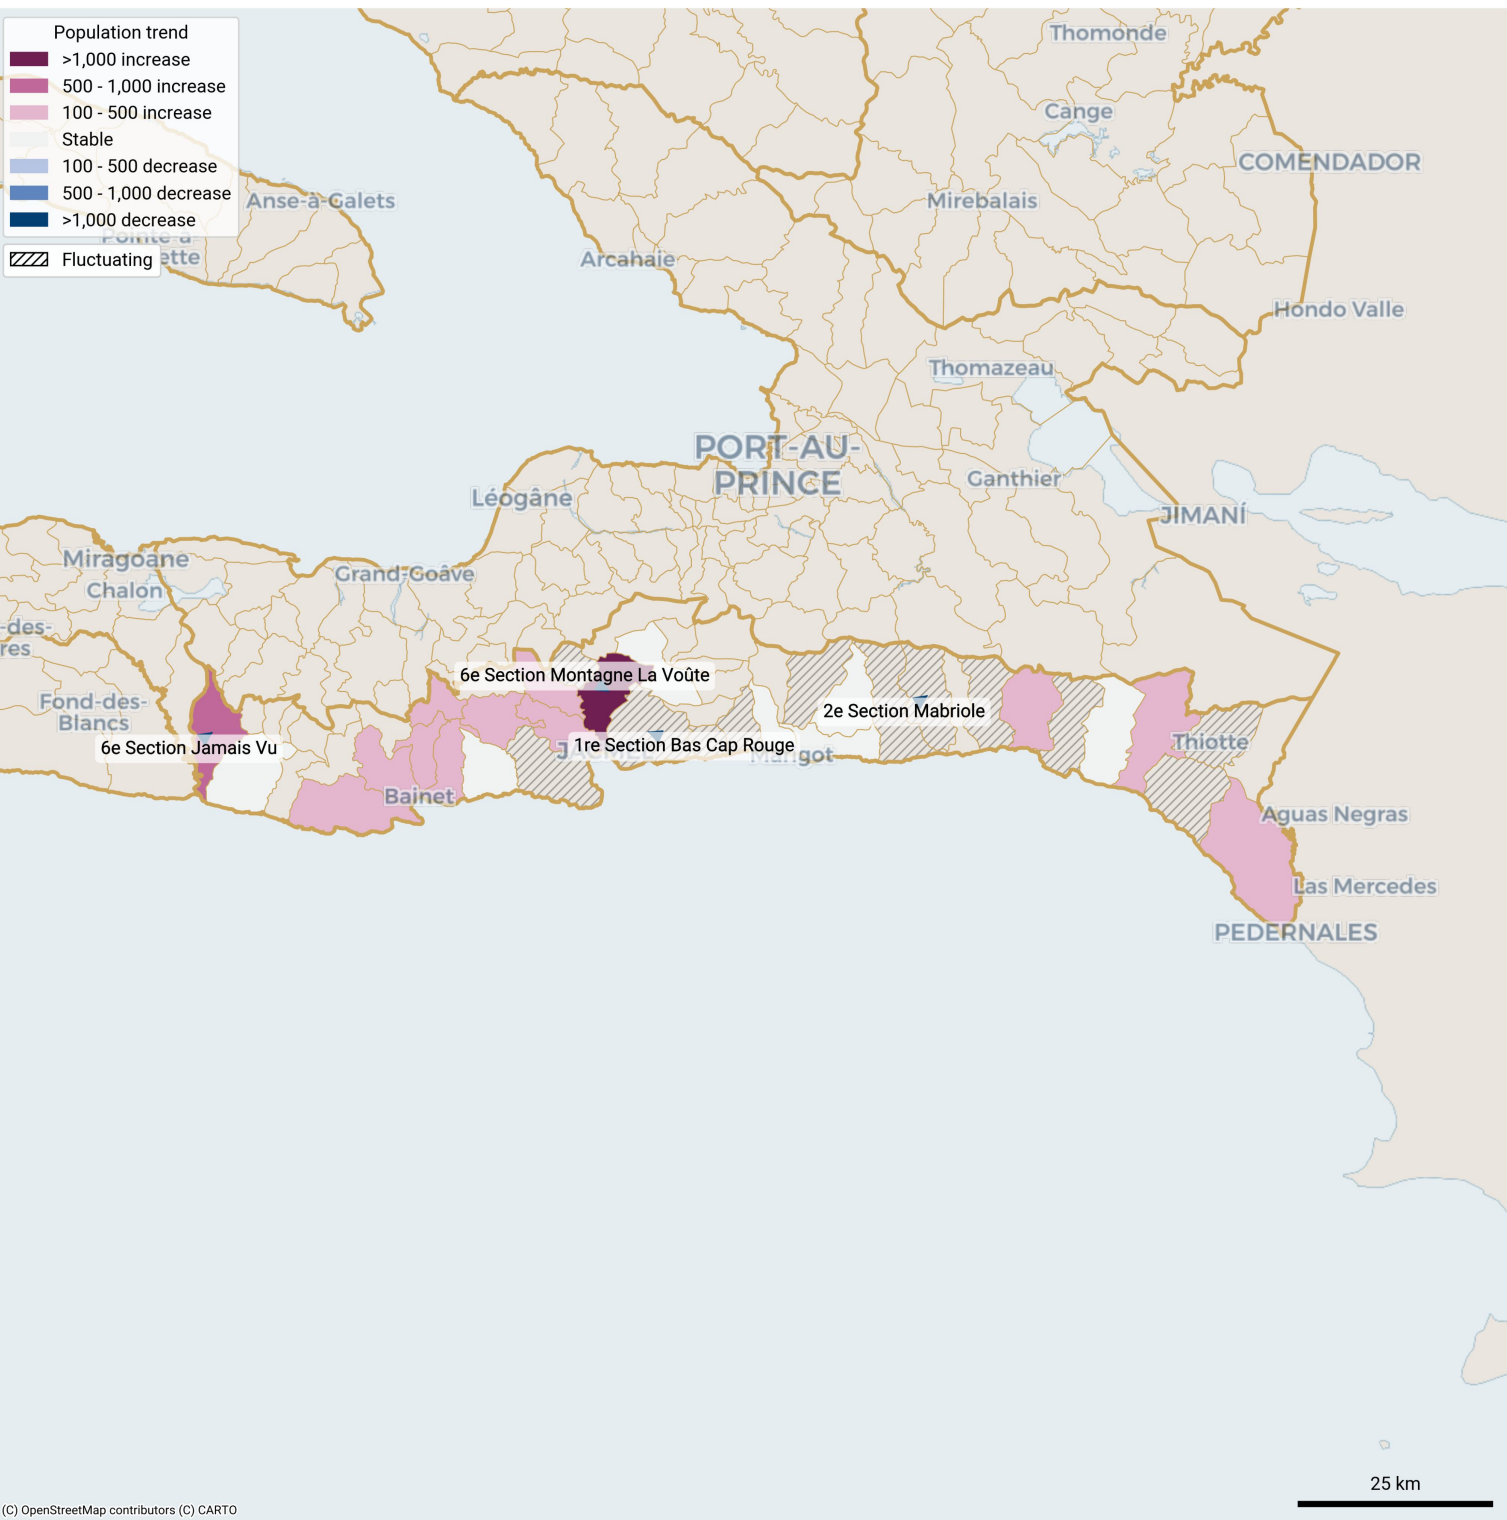

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

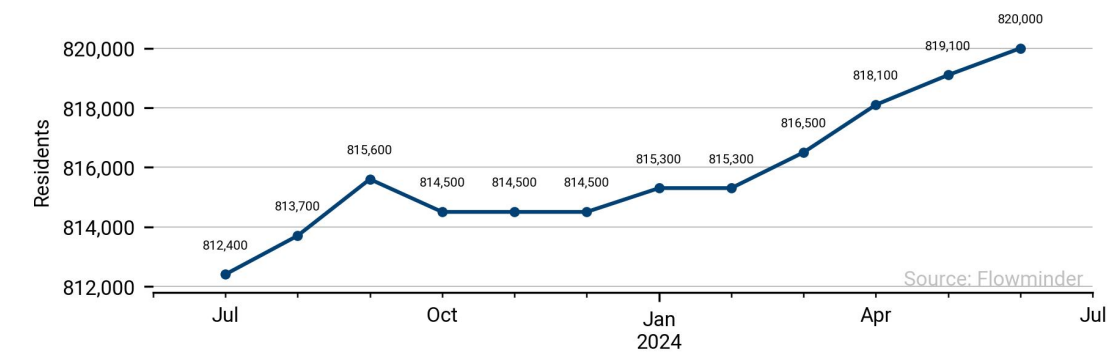

Changes in population estimates per communal section in Sud-Est (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

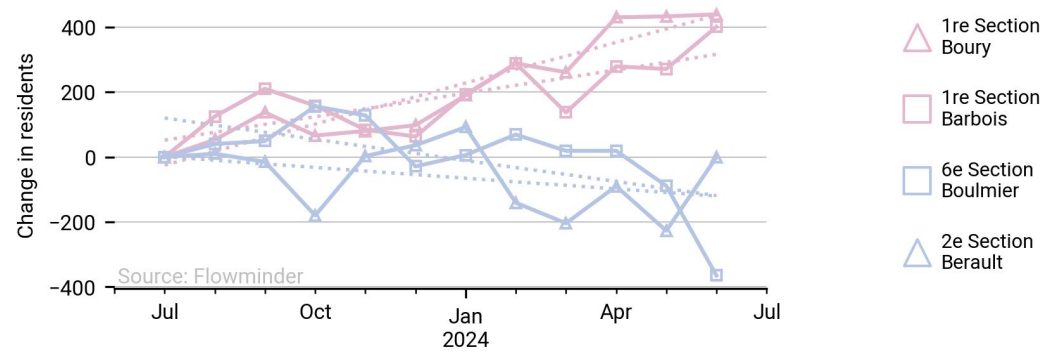

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

Preparedness | Mobility situation report - Haiti
Part 2 | Sud department overview (July 2023 - June 2024)

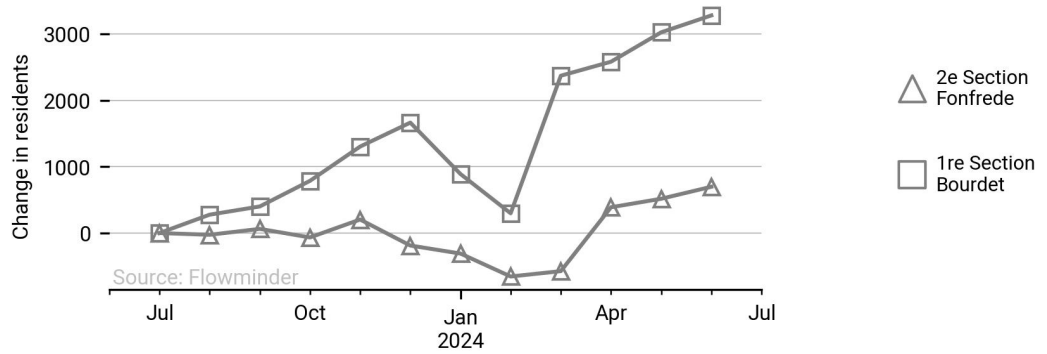

Monthly estimated population in Sud (July 2023 - June 2024): + 7,600 residents

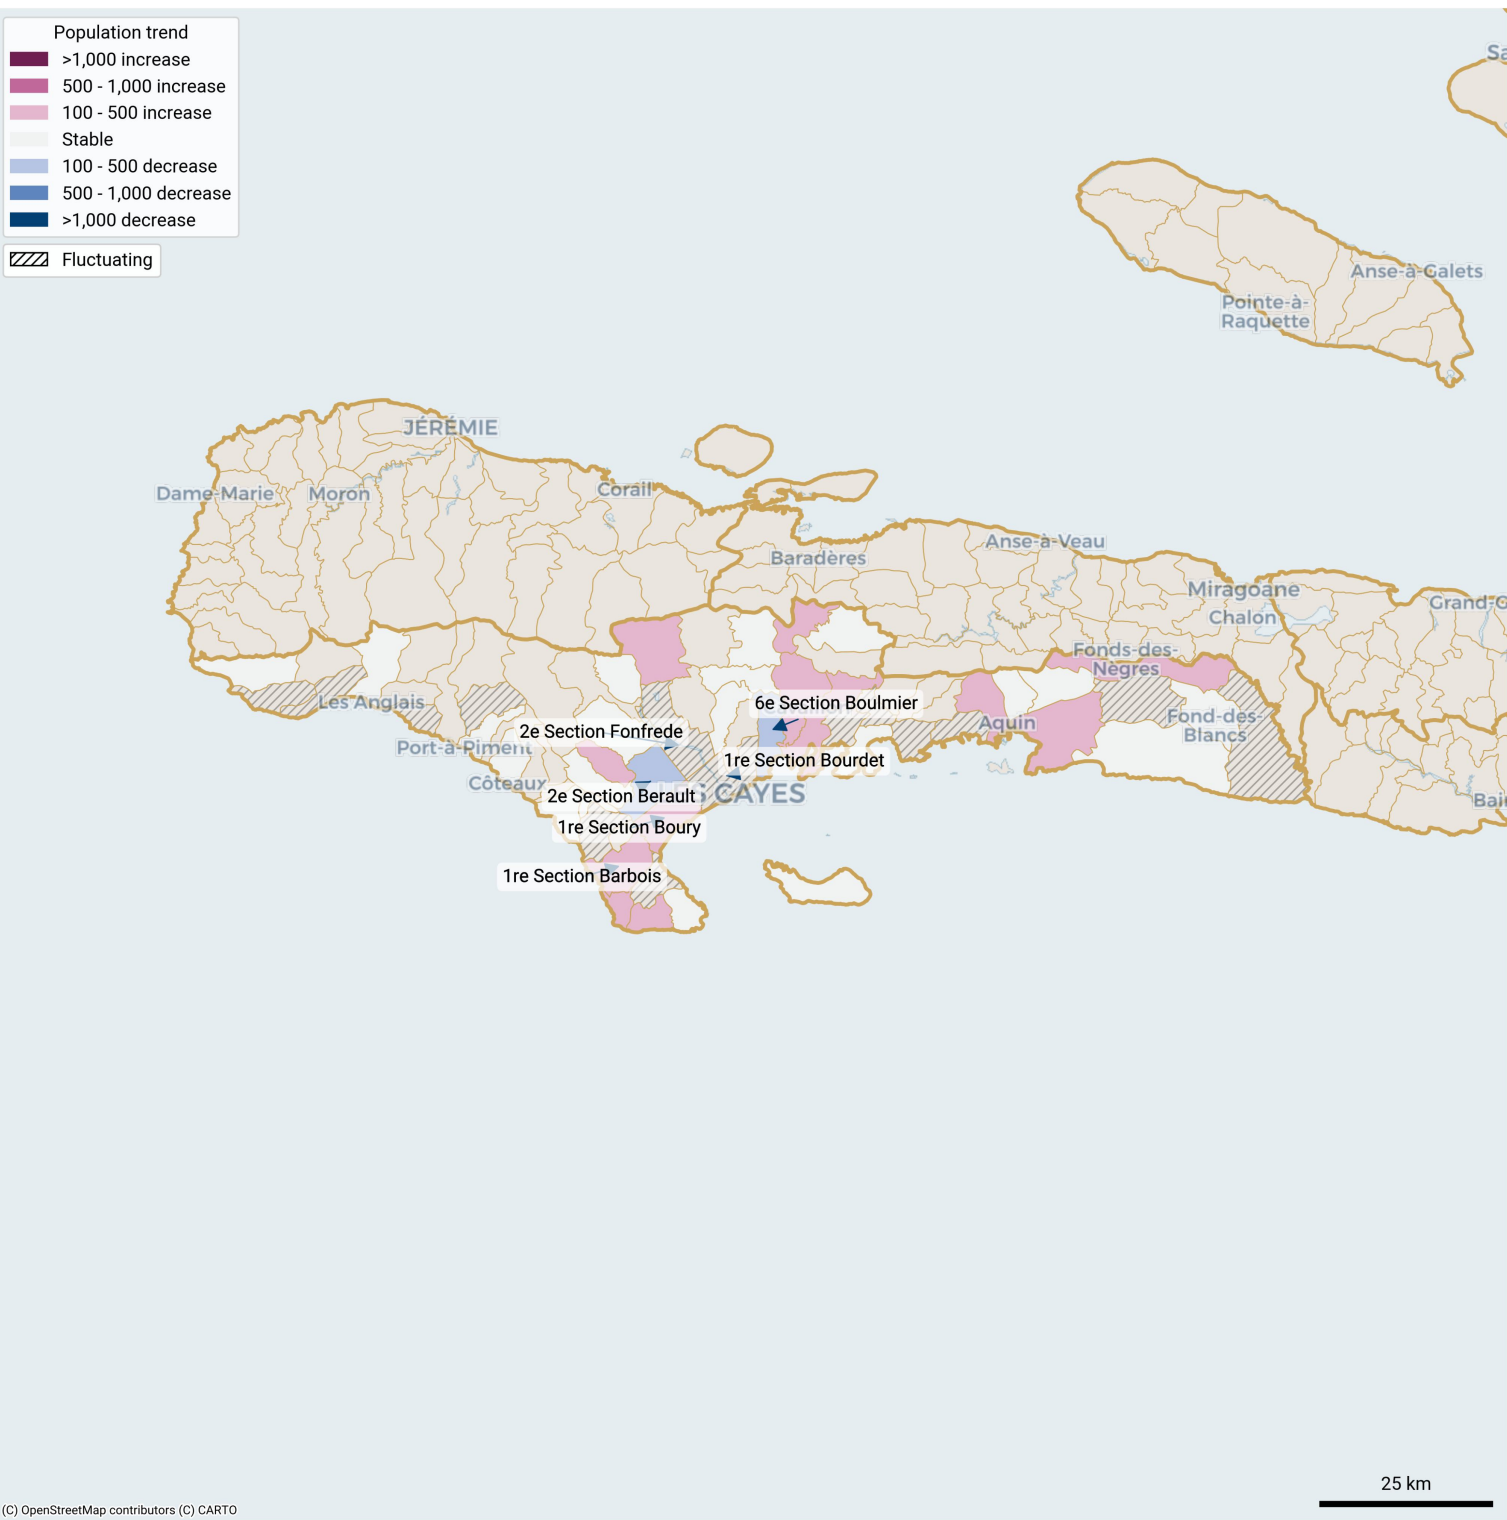

Communal sections with large increasing and decreasing trends (July 2023 - June 2024)

Fluctuating communal sections with largest changes in population (July 2023 - June 2024)

Changes in population estimates per communal section in Sud (July 2023 - June 2024): increasing, decreasing, fluctuating or stable

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

West	9e Section des Palmes	2,500	Fluctuating		360
West	10e Section des Palmes	1,800	Increasing	340	

These population and mobility estimates come from CDRs (mobile phone usage data) and other datasets for adjustments. However these are not traditional population and survey estimates, if you are unfamiliar with this data source please read our documentation which can be found at www.flowgeek.org

About this work

Flowminder’s ‘Population Mobility Data for Disaster Management’ project aims to improve the availability and use of mobile operator data (Call Detail Records, CDR data)-derived population-scaled estimates on population mobility, density and/or displacement data among humanitarian actors, with a particular focus on Haiti. Through this project, Flowminder will enable access to, and use of reliable and user-friendly information by humanitarian organisations for disaster preparedness and response, while strengthening its CDR processing and analysis software, FlowKit, to better support humanitarian sector data needs.

Authors & funders

This report was authored by the Flowminder Foundation.

This work is made possible by the generous support of the American People through the United States Agency for International Development (USAID). The contents are the responsibility of the Flowminder Foundation and do not necessarily reflect the views of USAID or the United States Government. This project is led by the Flowminder Foundation.

Acknowledgements

This study was made possible thanks to the anonymised (aggregated) mobile phone usage data (Call Detail Records, CDRs) provided by Digicel Haiti.

The Agence Française de Développement (AFD), the William and Flora Hewlett Foundation, and the Swiss Federal Department of Foreign Affairs (FDFA) are acknowledged for supporting other Flowminder’s activities in Haiti, which this works benefits from, where Flowminder focuses on enabling the increased access to and use of mobile operator data in ways that are ethically sound, financially viable, and sustainable

This report and its contents may only be shared with attribution to the Flowminder Foundation and Digicel Haiti. Adaptation is permitted as long as the changes are indicated and the Flowminder Foundation and Digicel Haiti are cited. Use of the report and its contents is limited to humanitarian and development purposes.

Disclaimer of Warranties and Limitation of Liability: To the extent possible, Flowminder and Digicel offer this report and its contents as-is and as-available, and make no representations or warranties of any kind concerning this report and its contents, whether express, implied, statutory, or other. This includes, without limitation, warranties of title, merchantability, fitness for a particular purpose, non-infringement, absence of latent or other defects, accuracy, or the presence or absence of errors, whether or not known or discoverable. To the extent possible, in no event will Flowminder or Digicel be liable on any legal theory (including, without limitation, negligence) or otherwise for any direct, special, indirect, incidental, consequential, punitive, exemplary, or other losses, costs, expenses, or damages arising out of the use of the report or its contents, even if Flowminder or Digicel have been advised of the possibility of such losses, costs, expenses, or damages. The disclaimer of warranties and limitation of liability provided above shall be interpreted in a manner that, to the extent possible, most closely approximates an absolute disclaimer and waiver of all liability.

Data privacy & governance

No personal data, such as an individual’s identity, demographics, location, contacts or movements, is made available to the government or any other third party at any time. All results produced by Flowminder are aggregated results (for example, subscriber density in a given municipality), which means that they do not contain any information about individual subscribers.

This data is fully anonymised. This approach complies with the European Union’s General Data Protection Regulation (EU GDPR2016/679). Data is processed on a server installed behind the mobile network operator’s firewall in Haiti, and no personal data leaves the operator’s premises.

Data considerations

The estimates shown are our best current assessment of movements. However, there are a number of uncertainties. The information should be interpreted together with other available evidence.

For more information about our methods, please read our *Haiti Mobility Data Indicators* documentation on residents and relocation [here](#).
